Whyte,2004-03-03 Landscape and History explores a complex relationship over the past five centuries The book is international and interdisciplinary in scope drawing on material from social economic and cultural history as well as from geography archaeology cultural geography planning and landscape history In recent years as the author points out there has been increasing interest in and concern for many aspects of landscape within British European and wider contexts This has included the study of the history development and changes in our perception of landscape as well as research into the links between past landscapes and political ideologies economic and social structures cartography art and literature There is also considerable concern at present with the need to evaluate and classify historic landscapes and to develop policies for their conservation and management in relation to their scenic heritage and recreational value This is manifest not only in the designation of particularly valued areas with enhanced protection from planning developments such as national parks and world heritage sites but in the countryside more generally Further Ian D Whyte argues changes in European Union policies relating to agriculture with a greater concern for the protection and sustainable management of rural landscapes are likely to be of major importance in relation to the themes of continuity and change in the landscapes of Britain and Europe Out of

Place Michael Hough,1990-01-01 Hough argues that the monotony of the modern landscape is a reflection of society s indifference to the diversity inherent in ecological systems and in human communities He uses world wide case studies to show how built areas work and how designers can maintain the identities of different places Landscape and Englishness David Matless,2016-09-15 As David Matless argues in this book updated in this accessible pocket edition landscape has been central to definitions of Englishness for centuries It is the aspect of English life where visions of the past present and future have met in debates over questions of national identity disputes over history and modernity and ideals of citizenship and the body Extensively illustrated Landscape and Englishness explores just how important the aesthetics of Britain s cities and countryside have been to its people Matless examines a wide range of material including topographical guides health

manuals paintings poetry architectural polemics photography nature guides and novels Taking readers to the interwar period he explores how England negotiated the modern and traditional the urban and rural the progressive and preservationist in its decisions over how to develop the countryside re plan cities and support various cultures of leisure and citizenship Tracing the role of landscape to Englishness from then up until the present day he shows how familiar notions of heritage in landscape are products of the immediate post war era and he unveils how the present always resonates with the past
