

The Interpretation of Contemporary "New Mainstream" Cinema ——The Battle at Lake Changjin and My People, My Country As Examples

Abstract. The new mainstream film is an upgraded version of the main theme film, which is more commercial, entertaining and popular. The themes are more extensive, and the casting is bolder and more grounded. Nowadays, the rise of new mainstream films also means that Chinese films have embarked on a new journey. A new type of film that combines artistry and commercialism skillfully has its unique advantages from both artistic and commercial perspectives.

1 Introduction

As an important vehicle for carrying China's dreams and building cultural confidence, cinema has always conveyed mainstream ideology and conceptual values with its rich and vivid content and forms. Since the 21st century, as the overall industrialisation of Chinese cinema has become more mature and the marketisation process has gradually advanced, melodramatic cinema has begun its own transformation and innovation. As melodramatic films have begun to pay real attention to the sense of cinema, experimenting with genre expression, balancing ideology, artistry and spectacle in narrative and characterisation, they have become the new mainstream commercial films, gaining high reputation and box office, and the industry has formed a consensus that "melodramatic" is moving towards "new mainstream". The industry has formed a consensus that the "main theme" is moving towards the "new mainstream".

2 The present theory

2.1 Definition and explanation of "new mainstream" films

When it comes to "new mainstream" films, we have to mention "theme" films and "mainstream" films. These three types of films all play an important role in carrying the Chinese dream and establishing their own cultural confidence. They always convey the mainstream ideology and ideological values in vivid content and form. But they are also very different from each other. This type of film is constantly developing and progressing. "Main melody" is originally a term from the music field, which refers to the main tune of a voice part in music performance. In 1987, at the National Feature Film Creation Conference, the Film Bureau put forward the

word "theme" for the first time, and encouraged filmmakers to create "theme" films with the idea of "sticking to the theme and sticking to the diversity". During that period, the birth of a large number of films with revolutionary historical themes also laid the keynote of Chinese theme films. In 1988, the film *Founding Ceremony*, which recorded the founding moment, was born and became the landmark work of the theme film. In the 1990s, with the rapid development of social economy and popular culture, the disadvantages of theme films began to appear. First, political expression was greater than artistic expression, and the theme was turned into a textbook of sound and painting; Secondly, too much emphasis is placed on creating the perfect hero image and the completely negative villain image. The characterization of the character image is single and unrealistic. As a result, the industry began to propose "mainstream film", which, on the one hand, continued the valuable character of the traditional theme film in advocating the mainstream cultural route, on the other hand, actively adapted to the new era of market economic conditions and the development mode of film industrialization reform. The commercialization of traditional theme films, that is, the commercialization of theme films, has become a good strategy for the film and television industry to deal with the drawbacks of theme films. After entering the 21st century, with the overall level of the Chinese film industry rising and the growing maturity of marketization, "mainstream" films have begun their own innovation and transformation, breakthrough and innovation. The narrative mode of the "new mainstream" film has gradually changed in recent years. Instead of outputting various grand political ideas in a condescending manner, it has made the audience resonate in the historical moment reappearance of the national memory through the shaping of civilian heroes in the background of the great era, and realized the collective memory of building social identity. In recent years, a large number of new mainstream films have

Death Is Not So Bad! Tim Renner, 2013-12-11 When Tim Renner applied to the German record company Polydor in 1986, he intended to write an exposé about the music industry. However, things went differently and he turned this exposé into a career. For eighteen years, his biography has been intermeshed with the development of the music industry; he led bands like Element of Crime, Rammstein, Tocotronic and Philip Boa to success. He raised up higher and higher on the ladder, finally reaching the top of Universal Music Germany. He witnessed how musical development has been hampered by the pressure of the markets, how pop and commerce diffused, and importantly, he witnessed the rapid dissolution of old commercial structures through the forces of digitalization and globalization. But the ponderous giant labels kept their eyes shut in front of these developments, and Renner finally quit. After his leave from Universal in 2004, he described his point of view on what he found wrong, tracks and challenges of contemporary pop music. *Death is not bad* is a profound analysis of culture and music in times of digitalization, based on the vision that creativity, consumption and capital could find a way of coexistence. Ten years after the German edition of this book was published, some passages read like a history book about a long forgotten time. Some passages pointing to developments which are fully manifested today and look to evolve further in the future. The book shows the changes of a whole industry and the first steps of a society on its way into the digitalized future. [World Class Diversity Management](#) R. Roosevelt Thomas Jr., 2010-08-02 Globalization is transforming the very nature of our business relationships, decision making processes and interactions, making world class diversity management more needed than ever before. But until now, the field of diversity had no established standard for evaluating best practices or even agreement on

fundamental philosophies principles and concepts In this pioneering book the world's leading diversity authority proposes a framework that will facilitate the development of a truly world class standard for diversity management R Roosevelt Thomas begins by laying out his Four Quadrant model which encompasses all core diversity strategies managing workforce demographic representation managing demographic relationships managing diverse talent and managing all strategic diversity mixtures He analyzes the goals motives approaches accomplishments and challenges associated with each quadrant as well as the paradigm or mindset that lies behind each quadrant's express purpose Having laid out this broad range of strategies Thomas shows how to realize them through the Strategic Diversity Management Process by far the most effective method for implementation A detailed case study of CEO Jeff Kilt a fictional composite of the many executives Thomas has worked with effectively illustrates the complexities encountered when working with each of the Four Quadrant strategies in the real world This book offers a comprehensive blueprint that will enable leaders to address any diversity issue not just race or gender in any setting anywhere in the world Most important it proves that a world class standard of diversity management is indeed a possible and achievable goal
