On Work Race And The Sociological Imagination:

On Work, Race, and the Sociological Imagination Everett C. Hughes, 1994-09-15 The writings in this volume highlight Hughes's contributions to the sociology of work and professions race and ethnicity and the central themes and methods of the discipline Hughes was the first sociologist to pay sustained attention to occupations as a field for study and wrote frequently and searchingly about them Several of the essays in this collection helped orient the first generation of Black sociologists including Franklin Frazier St Clair Drake and Horace Cayton Blood, Powder, and Residue Beth A. Bechky, 2021-01-19 A rare behind the scenes look at the work of forensic scientists The findings of forensic science from DNA profiles and chemical identifications of illegal drugs to comparisons of bullets fingerprints and shoeprints are widely used in police investigations and courtroom proceedings While we recognize the significance of this evidence for criminal justice the actual work of forensic scientists is rarely examined and largely misunderstood Blood Powder and Residue goes inside a metropolitan crime laboratory to shed light on the complex social forces that underlie the analysis of forensic evidence Drawing on eighteen months of rigorous fieldwork in a crime lab of a major metro area Beth Bechky tells the stories of the forensic scientists who struggle to deliver unbiased science while under intense pressure from adversarial lawyers escalating standards of evidence and critical public scrutiny Bechky brings to life the daily challenges these scientists face from the painstaking screening and testing of evidence to making communal decisions about writing up the lab report all while worrying about attorneys asking them uninformed questions in court She shows how the work of forensic scientists is fraught with the tensions of serving justice constantly having to anticipate the expectations of the world of law and the assumptions of the public while also staying true to their scientific ideals Blood Powder and Residue offers a vivid and sometimes harrowing picture of the lives of highly trained experts tasked with translating their knowledge for others who depend on it to deliver justice

State Schooling and Ethnic Identity Zhiyong Zhu, 2007-01-01 State Schooling and Ethnic Identity examines the influence of state schooling on Tibetan students ethnic identity Zhiyong Zhu has developed a case study of Changzhou Tibetan Middle School after a preferential educational policy was put in place by the Chinese government in the early 1980s By examining and analyzing student diaries Zhu has

developed a theoretical model for the construction of ethnic identity *Handbook of Medical Sociology, Sixth Edition* Chloe E. Bird, Peter Conrad, Allen M. Fremont, Stefan Timmermans, 2010-11-29 The latest version of an important academic resource published about once a decade since 1963 **The Anthem Companion to Everett Hughes** Rick Helmes-Hayes, Marco Santoro, 2016-12-01 The Anthem Companion to Everett Hughes is a comprehensive and updated critical discussion of Hughes's contribution to sociology and his current legacy in the social sciences A global team of scholars discusses issues such as the international circulation of Hughes's work his intellectual biography his impact on current ethnographic research practices and the use in current research of such Hughesian concepts as master status dirty work and bastard institutions This companion is a useful reference for students of classical sociology practitioners of ethnographic research and scholars of sociology in the Chicagoan tradition *The Enterprising Barrister* Atalanta Goulondris, 2020-06-11 What is it like working as a barrister in the 21st century The independent Bar has transformed in the last 30 years into a commercialised enterprising profession Based on interviews with and observation of barristers and chambers staff this book identifies key changes that have taken place at the Bar and how these are reshaping and reformulating barristers' professionalism and working culture This is the first empirical overview of the depth scope and effects of multiple reforms that have been imposed on the profession It explores how this once unified profession has fragmented as the lived experiences of barristers in different practice areas have diverged Highly specialised sets of chambers now operate like businesses whilst others who are dependent on legal aid funding struggle to survive This book offers a unique examination of different sites of change how the chambers model has evolved how entrepreneurial barristers market themselves how aspirant law students prepare to enter the profession and how regulatory and procedural reforms have imposed managerial constraints on practitioners The conclusion considers what the far reaching changes mean for the prospects of the Bar in England and Wales **Builders** Darren Thiel, 2013-05-07 Building workers constitute between five and ten per cent of the total labour market in almost every country of the world They construct repair and maintain the vital physical infrastructure of our societies and we rely upon and trust their achievements every day Yet we know surprisingly little about builders their cultures the organization of their work or the business relations that constitute their industry This book based on one year's participant observation on a London construction site redresses this gap in our knowledge by taking a close up look at a section of building workers and businessmen By examining the organizational features of the building project and describing the skill sweat malingering humour and humanity of the building workers Thiel illustrates how the builders were mostly autonomous from formal managerial control regulating their own outputs and labour markets This meant that the men's ethnic class and gender bound cultural activities fundamentally underpinned the organization of their work and the broader construction economy and thereby highlights the continuing centrality of class bound culture and social stratification in a post industrial late modern world Thiel outlines the on going connections and intersections between economy state class and culture ultimately

showing how these factors interrelated to produce the building industry its builders and its buildings Based predominately on cultural and economic sociology this book will also be of interest to those working in the fields of gender and organizational studies social class and inequality migration and ethnicity urban studies and social identities *The Grind* Alexis S. McCurn,2018-09-10 Few scholars have explored the collective experiences of women living in the inner city and the innovative strategies they develop to navigate daily life in this setting The Grind illustrates the lived experiences of poor African American women and the creative strategies they develop to manage these events and survive in a community commonly exposed to violence Alexis S McCurn draws on nearly two years of naturalistic field research among adolescents and adults in Oakland California to provide an ethnographic account of how black women accomplish the routine tasks necessary for basic survival in poor inner city neighborhoods and how the intersections of race gender and class shape how black women interact with others in public This book makes the case that the daily consequences of racialized poverty in the lives of African Americans cannot be fully understood without accounting for the personal and collective experiences of poor black women **Policing Contingencies** Peter K. Manning,2010-02-15 Despite constant calls for reform policing in the United States and Britain has changed little over the past thirty years In Policing Contingencies Peter K Manning draws on decades of fieldwork to investigate how law enforcement works on the ground and in the symbolic realm and why most efforts to reform the way police work have failed so far Manning begins by developing a model of policing as drama a way of communicating various messages to the public in an effort to enforce moral boundaries Unexpected outcomes or contingencies continually rewrite the plot of this drama requiring officers to adjust accordingly New information technologies media scrutiny and representations and community policing also play important roles and Manning studies these influences in detail He concludes that their impacts have been quite limited because the basic structure of policing officer assessments based on encounters during routine patrols has remained unchanged For policing to really change Manning argues its focus will need to shift to prevention Written with precision and judiciously argued Policing Contingencies will be of value to scholars of sociology criminology information technology and cultural theory *Critical Perspectives on the Management and Organization of Emergency Services* Paresh Wankhade,Leo McCann,Peter Murphy,2019-05-16 Critical Perspectives on the Management and Organization of Emergency Services makes an important contribution to the subject of emergency services management and to public administration and organization studies more generally It critically assesses developments in emergency services management by examining the multi dimensional nature of the provision of emergency services and their connectedness in advanced western democracies The effective management of emergency services has never been more important than in today s high pressured and cost conscious public sector The authors of this volume forensically analyse the challenges of delivering emergency services within this context This book provides an in depth scholarly and comprehensive analysis of the changing landscape of emergency service provision and clearly addresses a gap

in the market for a critical volume on the emergency services For anyone seeking to understand why and how the management of emergency services matters this collection is essential reading

Jewish Ethnic Identity and Relations in Hellenistic Egypt Stewart Moore, 2015-07-14 In Jewish Ethnic Identity and Relations in Hellenistic Egypt Stewart Moore investigates the foundations of common assumptions about ethnicity To maintain one's identity in a strange land was it always necessary to band tightly together with one's coethnics Sociologists and anthropologists who study ethnicity have given us a much wider view of the possible strategies of ethnic maintenance and interaction The most important facet of Jewish ethnicity in Egypt which emerges from this study is the interaction over the Jewish Egyptian boundary Previous scholarship has assumed that this border was a Siegfried Line marked by mutual contempt Yet Jews Egyptians and also Greeks interacted in complicated ways in Ptolemaic Egypt with positive relationships being at least as numerous as negative ones

Law and Society in East Asia Christoph Antons, 2017-07-05 The massive and complex process of change in East Asia over recent decades has brought about a transformation in the nature of law and legal institutions in the region Whilst the process of change has to some degree mimicked western models of law and legal change there have been significant differences in approach due to the different social foundations of East Asian societies The more obvious of these has been the variety of ways in which rule of law ideas have been adopted in many East Asian countries where the role of the state is more dominant when compared with Western models This volume brings together a selection of the most important writings on East Asia of researchers in recent years and shows the broad range of questions which researchers have been addressing about the effect of law reform and legal change in societies dominated by traditional values and political forces and at a time of massive economic change
