## **Radiation Biochemistry Volume II Tissues And Body Fluids:**

**Tissues and Body fluids** Kurt Altman, 2012-12-02 Radiation Biochemistry Volume II Tissues and Body Fluids deals with the radiation biochemistry of mammalian organs and body fluids. Emphasis is placed on descriptions of overall biochemical changes in irradiated tissues and animals on the dependency of these changes on cellular responses and on the interactions among different organ systems. Consideration is also given to a practical application of radiation biochemistry to the problem of assessing the nature, tissue localization and extent of radiation injury in man and animals. The book's nine chapters discuss the following: the general aspects of radiation biochemistry; bone marrow and red blood cells; lymphoid organs; gastrointestinal tract; the liver; radiation biochemistry of miscellaneous organs; radiation biochemistry of tumors; changes in the biochemistry of body fluids after irradiation; and hormones and systemic effects. This text will be useful to life scientists who are just embarking in the field of radiation biology. In particular, the discussions of the complications introduced by body changes secondary to radiation damage, such as partial starvation and changes in cell populations of a given tissue, should help prevent errors in interpretation that have been committed in the past. The 5-HT<sub>3</sub> class of serotonin receptors occupies a privileged position as selective antagonists; acting at this receptor are potential anxiolytics and antipsychotics, in addition to being useful as anti-nausea/anti-emetic agents for cancer patients undergoing chemotherapy. Within this volume, the best specialists in the field summarize the biochemical, pharmacological, electrophysiological and functional properties of 5-HT<sub>3</sub> receptors together with the potential use of 5-HT<sub>3</sub> ligands in the treatment of visceral dysfunctions, schizophrenia, anxiety and pain. **Tissues and Body Fluids** Kurt Altman, 2012 Tissues and Body fluids
