Radiation Sources

**Nuclear Regulatory Commission (U S
) , Nuclear Regulatory Commission (U S**

Radiation Sources:

Radiation Source Use and Replacement National Research Council, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Committee on Radiation Source Use and Replacement, 2008-05-25 In the United States there are several thousand devices containing high activity radiation sources licensed for use in areas ranging from medical uses such as cancer therapy to safety uses such as testing of structures and industrial equipment Those radiation sources are licensed by the U S Nuclear Regulatory Commission and state agencies Concerns have been raised about the safety and security of the radiation sources particularly amid fears that they could be used to create dirty bombs or radiological dispersal device RDD In response to a request from Congress the U S Nuclear Regulatory Commission asked the National Research Council to conduct a study to review the uses of high risk radiation sources and the feasibility of replacing them with lower risk alternatives The study concludes that the U S government should consider factors such as potential economic consequences of misuse of the radiation sources into its assessments of risk Although the committee found that replacements of most sources are possible it is not economically feasible in some cases The committee recommends that the U S government take steps to in the near term to replace radioactive cesium chloride radiation sources a potential dirty bomb ingredient used in some medical and research equipment with lower risk alternatives The committee further recommends that longer term efforts be undertaken to replace other sources The book presents a number of options for making those replacements

Novel Radiation Sources Using Relativistic Electrons P. Rullhusen, X. Artru, Pierre Dhez, 1998 The purpose of this book is to give a description of the state of the art in theoretical and experimental work achieved in radiation source development It summarizes clearly and comprehensibly the basic physical aspects needed to understand the phenomena and also provides the interested reader with sufficient literature to be able to follow the development in more detail In addition it contains a unified view of most theoretical effects and their common properties The most recent developments as well as references to further work can be found in this volume In many cases review articles and textbooks published in specialized areas are also incorporated into the text

Countering Nuclear and Radiological Terrorism Samuel Apikyan, David Diamond, 2007-05-22 In recognition that no single country possesses all the answers to the critical scientific institutional and legal questions associated with combating nuclear and radiological terrorism the 2005 Workshop and these proceedings were structured to promote wide ranging multi national exploration of critical technology needs and underlying scientific challenges to reducing the threat of nuclear radiological terrorism to illustrate through country specific presentations how resulting technologies were used in national programs and to outline the role of legal policy and institutional frameworks in countering nuclear radiological terrorism One key outcome of this book is a better understanding of the independent contributions from across the international community of the scientific and technological components and the legal policy and institutional components to combating nuclear radiological terrorism The book can serve as a tool for communicating the

outcomes of the workshop to the multi national scientific communities engaged in combating nuclear radiological terrorism and to those working at governmental and policy levels Nuclear Science Abstracts ,1976 Energy information data base United States. Dept. of Energy. Technical Information Center,1979 TID. ,1978 **Nuclear Power and Energy Security** Samuel Apikyan,David Diamond,2009-10-19 The basic logic is very simple Countries around the globe have a need for more electrical generating capacity because of increases in population and increases in energy use per capita The needs are constrained by the requirement that the ba load energy source be economical secure and not emit climate changing gases Nuclear power fits this description Therefore many countries that have not had a nuclear power program or only had a small program see a need to develop one in the future However the development of a national nuclear energy program is not so simple The purpose of the NATO Advanced Research Workshop on Nuclear Power and Energy Security was to contribute to our understanding of how these programs might evolve The workshop took place 26 29 May 2009 in Yerevan Armenia Approximately 50 participants discussed the infrastructure that is needed and some of the reactor options that might be considered The papers in this book helped define the discussion that took place The infrastructure that is needed includes a legal framework a functioning regulator a plan for waste disposal a plan for emergency response etc These needs were explained and just as importantly it was explained what international bilateral and regional cooperation is available Although there were many co tries represented the Armenian experience was of particular interest because of where the meeting was located The papers on reactor options covered both innovative and evolutionary designs **Senate Reports** United States. Congress,2001 Nuclear Regulatory Legislation, 110th Congress, 2D Session, Volumes 1 and 2 Nuclear Regulatory Commission (U S),Nuclear Regulatory Commission (U S,2009-07-09 NOTE NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT OVERSTOCK SALE Significantly reduced list price *Health Physics in the 21st Century* Joseph John Bevelacqua,2008-06-25 Adopting a proactive approach and focusing on emerging radiation generating technologies Health Physics in the 21st Century meets the growing need for a presentation of the relevant radiological characteristics and hazards As such this monograph discusses those technologies that will affect the health physics and radiation protection profession over the decades to come After an introductory overview the second part of this book looks at fission and fusion energy followed by a section devoted to accelerators while the final main section deals with radiation on manned space missions Throughout the author summarizes the relevant technology and scientific basis while providing over 200 problems plus solutions to illustrate and amplify the text Twelve appendices add further background material to support and enrich the topics addressed in the text making this invaluable reading for students and lecturers in physics biophysicists clinical nuclear and radiation physicists as well as physicists in industry *108-1 Hearings: Energy And Water Development Appropriations For 2004, Part 6, March 20, 2003, ** ,2004 *Review* ,1981 Journal of the House of Representatives of the United States United States. Russian Views on Countering Terrorism During Eight Years of Dialogue

Russian Academy of Sciences, National Research Council, Policy and Global Affairs, Development, Security, and Cooperation, Office for Central Europe and Eurasia, 2009-05-28 Few countries have endured as many attacks of terrorism during the past two decades as has Russia From bombings on the streets of a number of cities to the disruption of pipelines in Dagestan to the taking of hundreds of hostages at a cultural center in Moscow and at a school in Beslan the Russian government has responded to many political and technical challenges to protect the population The measures that have been undertaken to reduce vulnerabilities to terrorist attacks and to mitigate the consequences of attacks have been of widespread interest in many other countries as well In June 1999 the Presidents of the National Academy of Sciences and the Russian Academy of Sciences initiated an inter academy program to jointly address common interests in the field of counter terrorism Four workshops were held from 2001 to 2007 and additional consultations were undertaken prior to and after the series of workshops This report includes 35 of the Russian presentations during the workshop series Collectively they provide a broad overview of activities that have been supported by Russian institutions
