Radiochemical Methods in Analysis D. Coomber, 2012-12-06 The aim of this book is to give an account of the principal radiochemical methods used in chemical analysis It is assumed that the reader already has some background knowledge of radioactivity available from several general textbooks For this reason some subjects e g the fundamentals of radio activity the properties of radiation statistics of counting procedures the precautions needed in working with radioactive materials which could have occupied half the text are not considered in detail The different aspects of radiochemical analysis have been covered by specialized books and reviews e g on activation analysis gamma spectrometry radiometric titrations A good deal of information is in the form of reports of meetings and symposia and liquid scintillation counting for instance has been mainly covered in this way There are also a large number of journals It is therefore hoped that this book will help fill the gap between the introductory texts and the specialized sources many of which are referred to in the chapter references The first three chapters in the present volume deal with the methods of measurement of radioactive nuclides Chapter I gives a general account of detection and measurement techniques The next two chapters are devoted to two specialized techniques gamma ray spectrometry and liquid scintillation counting

Applications of Nuclear and Radiochemistry Richard M. Lambrecht, Nabil Morcos, 2013-10-22 Applications of Nuclear and Radiochemistry is a collection of articles focusing on contemporary applied research on radioactive isotopes The monograph is based on the Second Chemical Congress of the North American Continent held at Las Vegas Nevada in August 1980 The book contains articles on developments in nuclear chemistry and radiochemistry emphasizing the topic of radiopharmaceutical chemistry The text is composed of two parts wherein the first part is comprised of papers dealing with advances in the production of radionuclides for nuclear medicine in

the synthesis of labeled pharmaceuticals and in the design and use of specific diagnostic agents These sections cover research areas on machines used for research such as compact accelerators positron emission and single photon tomographs Emphasis is given to the radiochemistry and design of radiopharmaceuticals for receptor studies and for determining physiological function and metabolism of the brain heart and tumors The second part examines contemporary advances including the impact of radiochemistry in China pertaining to the fallout from Chinese nuclear tests This part also contains a section covering a list of uncommon topics The text is of interest to nuclear scientists academicians in the field of radiology and radiochemistry researchers in nuclear medicine nuclear engineers and environmental researchers

The growing use of nuclear medicine the potential expansion of nuclear power generation and the urgent needs to protect the nation against external nuclear threats to maintain our nuclear weapons stockpile and to manage the nuclear wastes generated in past decades require a substantial highly trained and exceptionally talented workforce Assuring a Future U S Based Nuclear and Radiochemistry Expertise examines supply and demand for expertise in nuclear chemistry nuclear science and radiochemistry in the United States and presents possible approaches for ensuring adequate availability of these skills including necessary science and technology training platforms Considering a range of reasonable scenarios looking to the future none of these areas are likely to experience a decrease in demand for expertise However many in the current workforce are approaching retirement age and the number of students

opting for careers in nuclear and radiochemistry has decreased dramatically over the past few decades In order to avoid a gap in these critical areas increases in student interest in these careers in the research and educational capacity of universities and colleges and sector specific on the job training will be needed Concise recommendations are given for actions to avoid a shortage of nuclear chemistry nuclear scientists and radiochemists in the future **Design and Construction of Radiochemical Laboratories** ,1951 Radiochemistry of Carbon, Nitrogen and Oxygen Sajjad Munawwar,Richard M.
