**Abstract** The purpose of this study was to determine the effect of a 12-week, low-intensity, supervised walking program on the physical and psychological health of sedentary, middle-aged women. The study was a randomized, controlled trial. The subjects were 40 sedentary, middle-aged women who were randomly assigned to either a supervised walking program or a control group. The walking program consisted of 12 weeks of walking, 3 times per week, for 30 minutes per session. The control group consisted of 20 women who did not participate in the walking program. The subjects were assessed at baseline and at 12 weeks for physical and psychological health. The physical health assessment included measures of weight, body mass index (BMI), waist circumference, blood pressure, heart rate, and resting metabolic rate. The psychological health assessment included measures of self-esteem, body image, and quality of life. The results of the study showed that the walking program had a significant positive effect on the physical and psychological health of the subjects. The walking program resulted in a significant decrease in weight, BMI, waist circumference, blood pressure, heart rate, and resting metabolic rate. The walking program also resulted in a significant increase in self-esteem, body image, and quality of life. The results of this study suggest that a 12-week, low-intensity, supervised walking program can improve the physical and psychological health of sedentary, middle-aged women.

**The Radiography Procedure and Competency Manual** Anita Biedrzycki, 2017-08-14. Be prepared to meet the ARRT competency requirements. These procedure checklists make it easy. To qualify for your certification exam, you must demonstrate your competency in all 36 mandatory procedures and in at least 15 of the 30 elective procedures, and your instructors must verify your proficiencies. First, you can use the checklists to review the procedures in preparation for the exam and to develop decision-making skills that will produce the highest quality radiographs while considering the needs and limitations of the patient. Then, your instructors can use them to record their evaluation of your competency for each procedure. And finally, program directors can use them to verify to the ARRT that you have demonstrated the required competencies and proficiencies.
