Radioisotopes In Biology:

Radioisotopes in Biology Robert J. Slater, 2002 The book provides an introduction to the use of radioactivity in the bioscience laboratory An introduction sets the scene before two chapters that cover general aspects of radioactivity Methods for the detection of radioactivity are covered in two chapters that deal with scintillation counting and autoradiography Four chapters are concerned with the radioisotope protocols used to study key cellular processes radiolabelling of nucleic acids and proteins subcellular localisation and identification of macromolecules immunoassay methods and pharmacological techniques Two chapters provide a summary of legislative requirements in the USA and European Union and there is an Appendix of useful facts and addresses *Radioisotopes in the Human Body* F. W. Spiers, 2013-10-22 Radioisotopes in the Human Body Physical and Biological Aspects provides a unified presentation of the manner in which radioisotopes are deposited in the human body This book focuses on bone structure and the irradiation of bone because so many of the available radioisotopes are deposited in bone Organized into nine chapters this book begins with an overview of the physical considerations that are significant to the dosimetry of internally deposited radioisotopes This text then examines the structure and formation of bone in some detail Other chapters consider the importance of bone in relation to potential radiation damage This book discusses as well the relationship between radiation dose and radiobiological effects The final chapter deals with the case of internal irradiation by radioisotopes This book is a valuable resource for biologists health physicists scientists and students Radiation protection officers and individuals who have responsibilities for the safe use of radioactive substances will also find this book useful **Radioisotopes in Biology**, 1949 Radioisotope Experiments in High School Biology Evelyn M. Hurlburt, 1966 **Radioisotopes in the Biological Sciences**, 1967 This bibliography contains a total of 959 selected references on the use of radioisotopes in biological research These references were selected from the scientific literature published during the period 1958-1963 Author isotope and report number indexes are included **Radioisotopes in Biology** R.
