Radium, X Rays and the Living Cell Hector Alfred Colwell, Sidney Russ, 1915 **Radium, X Rays and the Living Cell** Hector A. Colwell, 2015-07-21 Excerpt from Radium X Rays and the Living Cell With Physical Introduction Our object in the present book is to describe some of the main experimental facts which have been established as to the effects that the X rays and the rays from radium have upon living cells In order to make the subject generally intelligible a description of the properties of these radiations was necessary and Part I is designed not only to provide information in this respect but to meet the needs of those who approach the subject with a view to experimental investigation A large amount of interest centres around the action which the rays have upon malignant cells and some of the most detailed studies have been made by investigators in this connection The results which have so far been reached are we may venture to hope a good augury for the foundations of a rational basis of radio therapy This however is but one aspect of the effect of the rays upon the living cell and we believe that an increased knowledge of the reactions exhibited by normal healthy cells and tissues is necessary before the real nature of the processes set up by these rays is revealed The subject is not approached from the clinical aspect but data have frequently been selected from the details of clinical observations when these have borne upon the subject matter in question About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Radium, X Rays and the Living Cell** Hector Alfred Colwell, Sidney Russ, 1915

Radium, X Rays and the Living Cell, with Physical Introduction H. A. questions about medical experimentation and the so called Golden Rule of medical ethics issues of safety and professional identity and the temptation of a powerful therapeutic tool that also posed significant risks in its formative years In this cautionary tale of technological medical progress Jeffrey Womack reveals how practitioners and their patients accepted uncertainty as a condition of their therapy in an attempt to alleviate human suffering Archives of Radiology and Electrotherapy ,1916 Index Medicus ,1925 **Index Medicus.
