**Buildings of Empire** Ashley Jackson, 2013-11-28 Buildings of Empire takes the reader on an exciting journey through thirteen territories of the British Empire From Dublin Castle to the glass and steel of Sir Norman Foster's Hong Kong and Shanghai Bank skyscraper these buildings capture the essence of the imperial experience painting an intimate portrait of the biggest empire the world has ever seen the people who made it and the people who resisted it as well as the legacy of the imperial project throughout the world Ashley Jackson visits classic examples of the buildings that the

British governed from the forts they often brutally imposed their rule from the railway stations they travelled from the banks they traded from the educational establishments they spread their values from as well as the grand colonial hotels they stayed in the sporting clubs and botanical gardens where they took their leisure and the monumental exhibition spaces in which they celebrated the achievements of settlement and imperial endeavour The history of these buildings does not end with the empire that built them Their story in the aftermath of empire highlights the continuing legacy of many of the structures and institutions the British left behind as well as the sometimes unexpected role that these former symbols of alien rule have played in the establishment of new national identities in the years since independence *Singapore* Joseph R.

*Labor* Marissa Brookes, 2019-03-15 Over the years many transnational labor alliances have succeeded in improving conditions for workers but many more have not In *The New Politics of Transnational Labor* Marissa Brookes explains why this dichotomy has occurred Using the coordination and context appropriate CCAP theory she assesses this divergence arguing that the success of transnational alliances hinges not only on effective coordination across borders and within workers local organizations but also on their ability to exploit vulnerabilities in global value chains invoke national and international institutions and mobilize networks of stakeholders in ways that threaten employers core material interests Brookes uses six comparative case studies spanning four industries five countries and fifteen years From dockside labor disputes in Britain and Australia to service sector campaigns in the supermarket and private security industries to campaigns aimed at luxury hotels in Southeast Asia Brookes creates her new theoretical framework and speaks to debates in international and comparative political economy on the politics of economic globalization the viability of private governance and the impact of organized labor on economic inequality From this assessment Brookes provides a vital update to the international relations literature on non state actors and transnational activism and shows how we can understand the unique capacities labor has as a transnational actor
