Randall,2010-12-20 In its brief but vigorous history gerontology has spawned a broadening range of specializations One of the newest of such specializations is narrative gerontology so named for its emphasis on the biographical or inside dimensions of the experience of aging Telling stories about our world our relationships and ourselves is fundamental to how we make meaning Everything from our history to our religion and our memories to our emotions is linked to the tales we tell ourselves and others about where we have

come from and where we are going They are central to who we are The biographical side of human life is every bit as critical to fathom as the biological side if we seek a more balanced positive and optimistic perspective on what aging is about if we would honor the dignity and complexity the humanity and uniqueness of the lives of older persons no matter what their health or economic standing In this respect a narrative approach is particularly suited to the exploration of such topics as meaning spirituality and wisdom and the connections they share This volume reflects a selection of new directions and insights and constitutes a general broadening and deepening of narrative gerontology exploring its implications for theory and research in the field of aging and for the quality of life of older adults themselves Such deepening indicates a greater refinement of thought method and intervention The evolution of narrative gerontology is also evidenced by a significant increase in the number of faculty and graduate students engaged in research in this area as well as by increasing collaboration among researchers practitioners and administrators in applying narrative insights to contexts such as long term care indeed healthcare in general These initiatives have given rise to the phrase narrative care as core care
