An Introduction to Railway Architecture Christian Augustus Barman,1950

Railway Architecture Bill Fawcett,2015-01-10 The great arched train sheds of Victorian Britain are often seen as the nineteenth century equivalent of medieval cathedrals once specific railway buildings became necessary around 1830 British architects seized the opportunity with both hands designing some of the great buildings of their age However these grand buildings are only part of the story not only was the country peppered with humbler individually styled station buildings but also with bridges signal boxes engine sheds and other structures specific to the railways In this illustrated introduction Bill Fawcett tells the story of railway architecture from the age of George Stephenson to modern times including such influential architects as Sir George Gilbert Scott and Charles Holden

"Iron, Ornament and Architecture in Victorian Britain " Paul Dobraszczyk,2017-07-05 Vilified by leading architectural modernists and Victorian critics alike mass produced architectural ornament in iron has received little sustained study since the 1960s yet it proliferated in Britain in the half century after the building of the Crystal Palace in 1851 a time when some architects engineers manufacturers and theorists believed that the

fusion of iron and ornament would reconcile art and technology and create a new modern architectural language

Comprehensively illustrated and richly researched *Iron Ornament and Architecture in Victorian Britain* presents the most sustained study to date of the development of mechanised architectural ornament in iron in nineteenth century architecture its reception and theorisation by architects critics and engineers and the contexts in which it flourished including industrial buildings retail and seaside architecture railway stations buildings for export and exhibition and street furniture Appealing to architects conservationists historians and students of nineteenth century visual culture and the built environment this book offers new ways of understanding the notion of modernity in Victorian architecture by questioning and re evaluating both Victorian and modernist understandings of the ideological split between historicism and functionalism and ornament and structure

Sir John Soane? Influence on Architecture from 1791 Oliver Bradbury, 2017-07-05 Sir John Soane s Influence on Architecture from 1791 A Continuing Legacy is the first in depth study of this eighteenth century British architect s impact on the work of others extending globally and still indeed the case over 200 years later Author Oliver Bradbury presents a compelling argument that the influence of Soane 1753 1837 has persevered through the centuries rather than waning around the time of his death Through examinations of internationally renowned architects from Benjamin Henry Latrobe to Philip Johnson as well as a number of not so well known Soanean disciples Bradbury posits that Soane is perhaps second only to Palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today concluding with the recent return to pure revivalism Previous investigations have been limited to focusing on Soane s late Georgian and then post modern influence this is the first in depth study of his impact over the course of two centuries Through this survey Bradbury demonstrates that Soane s influence has been truly international in the pre modern era reaching throughout the British Isles and beyond to North America and even colonial Australia Through his inclusion of select detailed case studies Bradbury contends that Soane s is a continuing not negated legacy in architecture

An Introduction to Railway Architecture

Christian Augustus Barman,1950 The Early History of Railway Tunnels Hubert Pragnell,2024-08-30 To the early railway traveller the prospect of travelling to places in hours rather than days hitherto was an inviting prospect however a journey was not without its fears as well as excitement To some the prospect of travelling through a tunnel without carriage lighting with smoke permeating the compartment and the confined noise was a horror of the new age What might happen if we broke down or crashed into another train in the darkness To others it was exciting with the light from the footplate flickering against the tunnel walls or spotting the occasional glimpses of light from a ventilation shaft To the directors of early railway companies planning a route was governed by expense and the most direct way Avoiding hills could add miles but tunnelling through them could involve vast expense as the Great Western Railway found at Box and the London and Birmingham at Kilsby Creating a cutting as an alternative was also costly not only in labour and time but also in compensation for landowners who opposed railways on visual and social grounds having seen their land divided by canals Construction involved millions of bricks or blocks of stone for sufficiently thick walls to withstand collapse However the entrance barely seen from the carriage window might be an impressive Italianate arch as at Primrose Hill or a castellated portal worthy of the Middle Ages as at Bramhope This book sets out to tell the story of tunnelling in Britain up to about 1870 when it was a question of burrowing through earth and rock with spade and explosive powder with the constant danger of collapse or flooding leading to injury and death It uses contemporary accounts from the dangers of railway travel by Dickens to the excitement of being drawn through the Liverpool Wapping Tunnel by the young composer Mendelssohn It includes descriptions from early railway company guide books newspapers and diaries It also includes numerous photographs and colored architectural elevations from railway archives The Civil Engineer and Architect's Journal William Laxton,1858

The Railway Magazine ,1913 Graphic Horizons Luis Hermida González,João Pedro Xavier,Inés Pernas Alonso,Carlos Losada Pérez,2024-04-05 This book reports on several advances in architectural graphics with a special emphasis on education research and heritage It gathers a selection of contributions to the 20th International Congress of Architectural Graphic Expression EGA 2024 held on May 27 29 2024 in Porto Portugal with the motto Graphic Horizons This is the third volume of a 3 volume set *An Historical Geography of Railways in Great Britain and Ireland* David Turnock,2016-12-05 Although a great deal has been published on the economic social and engineering history of nineteenth century railways the work of historical geographers has been much less conspicuous This overview by David Turnock goes a long way towards restoring the balance It details every important aspect of the railway's influence on spatial distribution of economic and social change providing a full account of the nineteenth century geography of the British Isles seen in the context of the railway The book reviews and explains the shape of the developing railway network beginning with the pre steam railways and connections between existing road and water communications and the new rail lines The author also discusses the impact of the railways on the patterns of industrial urban and rural change throughout the century Throughout the historical
