Handbook of Research on Decision-Making Capabilities Improvement With Serious Games Correia, Anacleto, Simões-Marques, Mário, 2023-07-10 How can a group be empowered to improve their ability to make decisions while also reinforcing the group's intended values, beliefs, and behaviors? Like positive reinforcement, which introduces a desirable or pleasant stimulus after a behavior has been completed and has been found to be effective for reinforcing such behavior, serious games introduce the behavior as a pleasant experience through engagement and entertainment. Where positive reinforcement relies heavily on the willpower of the subject to complete the behavior on their own, serious games introduce a motivational factor from the beginning of the behavior. Serious games are designed for purposes other than entertainment, such as training, learning, creating awareness, or behavior transformation through the introduction of content, topics, narratives, rules, and goals. They are immersive, engaging, and enjoyable, which enhances motivation and learning. The development of serious games is grounded in theoretical backgrounds such as motivation, constructivism, flow, experience, problem-based learning, and learning by doing. This method has been used in a variety of industries, including education, healthcare, military, policy analysis, and business functions such as marketing or financial purposes. They facilitate problem solving through challenges and rewards and use entertainment and engagement components. Serious games can address specific skills for many domains, foster collaboration, provide risk-free environments, and be used as analytical tools for educational research. They reinforce intended values, beliefs, and behaviors of players while conveying knowledge, skills, and attitudes, providing an integrated and effective approach to the transformation of an individual, group, or organization. The **Handbook of Research on Decision Making Capabilities Improvement With Serious Games** discusses the use of advanced technologies, including extended and immersive reality, digital twins, augmented reality (AR), virtual reality (VR), mixed reality (MR), and IoT sensors, to improve decision-making skills and learning through serious games. This book discusses user engagement, game adaptation, content adaptation, and sensor technology. It showcases how to increase decision-making skills in individuals and organizations and incorporates the latest developments in artificial intelligence and machine learning. Led by experts with over 20 years of experience and covering topics such as serious game design, intelligent content adaptation, and machine learning algorithms, this book is designed for professionals in education, instructional designers, curriculum developers, program developers, administrators, educational software developers, policymakers, researchers, training professionals, privacy practitioners, government officials, consultants, IT researchers, academicians, and students. Théologie pratique - Quelles formations ? Contenus, pratiques et pédagogies Christine Aulenbacher, 2020 Dans le domaine de la formation tant dans les disciplines traditionnelles de la théologie que de l'accompagnement psychopédagogique de publics adultes l'évolution de la théologie a surtout pensé à partir de ses contenus bien plus qu'à partir de ses publics Or les publics en formation aujourd'hui sont en pleine mutation La prise en compte de cette nouvelle réalité est une donnée essentielle pour la recherche en théologie pratique et en pédagogie religieuse Par ailleurs le déplacement du savoir théologique et de sa transmission des clercs vers des laïcs induit de facto un changement des approches mais également une évolution épistémologique Le savoir théologique ne se conçoit plus seulement en termes de transmission de corps de doctrine s'agissant de la théologie pratique il suppose également une mise en contexte Dès lors les offres de formations théologiques et pastorales théoriques et pratiques ne devraient-elles pas être pensées à partir des demandes et des exigences des nouveaux publics

Psycholinguistique et didactique des langues étrangères Danielle Chini, Pascale Goutéraux, 2008 Créé en 1994 par Danielle Bailly alors Professeur de Didactique et Linguistique de l'anglais l'Institut d'études anglophones Charles V de l'Université Paris VII le GEPED a pour ambition de fédérer

autour d'une réflexion sur une approche conceptualisatrice de l'enseignement-apprentissage de la langue étrangère des chercheurs didacticiens aux profils très variés qui s'intéressent à la Psycholinguistique de la langue étrangère et au courant didactique d'veil au langage. Le GEPED défend l'idée que l'apprentissage en milieu scolaire rend nécessaire un travail de la pratique langagière par un travail guidé en partie explicite d'ordre métalinguistique et métacognitif qui sollicite la conscience linguistique de l'apprenant. Le présent ouvrage rend compte des pistes de réflexion récurrentes explorées lors des journées d'études régulières du groupe aussi bien sous l'angle des méthodes et stratégies de guidage des contenus et de leur adaptation aux situations pragmatiques d'utilisation de la langue étrangère que sous l'angle des opérations cognitives langagières et métalingagières qui s'effectuent lors de l'apprentissage scolaire de la langue étrangère hors immersion. Mis part les deux premiers textes qui proposent une analyse dans le cadre conceptuel qui est le nôtre de l'état des lieux actuel de la didactique des langues et de ses orientations possibles pour l'avenir, les articles présents dans cet ouvrage sont pour la plupart issus de ces journées.
