The Enciclopedia de Lingüística Hispánica provides comprehensive coverage of the major and subsidiary fields of Spanish linguistics. Entries are extensively cross-referenced and arranged alphabetically within three main sections. Part 1 covers linguistic disciplines, approaches and methodologies. Part 2 brings together the grammar of Spanish including subsections on phonology, morphology, syntax and semantics. Part 3 brings together the historical, social and geographical factors in the evolution of Spanish. Drawing on the expertise of a wide range of contributors from across the Spanish-speaking world, the Enciclopedia de Lingüística Hispánica is an indispensable reference for undergraduate and postgraduate students of Spanish and for anyone with an academic or professional interest in the Spanish language. Spanish linguistics *Frasesología, Diatopía y Traducción / Phraseology, Diatopic Variation and Translation* Pedro Mogorrón Huerta, Antonio Albaladejo-Martínez, 2018-11-15

In all languages humans frequently use linguistic combinations called phraseological units (PUs) in communicative acts. These PUs are characterized by their institutionalized fixation and in many cases by their opacity. Traditionally, the work on phraseology has placed the emphasis on the total fixing of components and structures of verbal expressions. Variation in PUs is currently an uncontested fact and has been extensively studied and analyzed. In addition, in the case of languages like Spanish, English, French spoken in many countries, new creations or diatopic variants arise. While these diatopic expressions have been collected or analyzed in their territory of influence, no comprehensive collection showing all the expressions and contrastive analysis to observe the similarities and differences between these diatopic creations with all their idiosyncratic and cultural references have been made so far. The content of this volume deals with numerous linguistic, lexicographic and translational problems in the context of language variation in general as well as specifically related to diatopic variation. The aim is to make progress in these challenging and highly interesting areas which

still pose many comprehension and translation problems

Spanish Word Formation and Lexical Creation José Luis

Cifuentes Honrubia, Susana Rodríguez Rosique, 2011-12-15 This volume contributes a wider approach to word formation processes and sheds light on some unsolved issues While the formal relationships established between the different constituents of a complex word have been analyzed in great depth the semantic links have received little dedication In order to complete the analysis it is necessary to pay attention to the semantic properties associated to verbalization The main purpose of the book is to integrate both the semantic proposals and the formal perspectives concerning word formation This theoretical aim becomes the framework to study several mechanisms of lexical creation and neologisms Furthermore word formation is presented as a new source for Applied Linguistics Although the volume uses Spanish as a starting point it means to delimit formation patterns which may also be productive in other languages This book is sure to become an important reference in the controversial field of word formation
