Redesigning Democracy Ideas For Better Rules:

Redesigning Democracy Hans Gersbach, 2017-04-07 Could democracy do better This book presents a vision on optimal democracies and a set of new rules to help achieve them The monograph follows on the author's successful book *Designing Democracy* from 2005 and further develops its ideas While liberal democracies are the best systems of self governance for societies they rarely provoke great enthusiasm Democracies have been known to fail in achieving efficient outcomes and fair distributions of wealth Moreover many citizens take the democratic system for granted simply because they have yet to experience an alternative This book argues that the potential offered by democracies has not yet been exhausted and that optimal democracies are both the Utopia for societies and the aim that scientists should commit themselves to making a reality Furthermore the book suggests a number of insightful rules to improve the functioning of democracies We all know what to do we just don't know how to get re-elected after we have done it This famous quip by Jean Claude Juncker perfectly encapsulates the challenge this book takes on how to redesign our democratic institutions to overcome political short termism and make our democracies more efficient Several radical but highly relevant proposals are explored ranging from long term incentive contracts for politicians prediction markets over the outcomes of the next election that could be useful for incentive purposes minority voting initiative group constitutions and so on All these highly innovative proposals are rigorously grounded in standard economic analysis I highly recommend this book to anyone concerned about the state of our democracies and looking for constructive reforms Patrick Bolton Columbia University USA In a time of reeling democracies it is urgent to explore how to improve on the electoral system for the benefit of society Hans Gersbach has developed a most innovative and thought provoking research agenda at the intersection of political theory social choice and mechanism design He uncovers the potentially positive effects of political contracts between candidates and society of new rules for agenda setting and of mechanisms compensating the minorities Marc Fleurbaey Princeton University USA *21st Century Economics* Bruno S. Frey, Christoph A. Schaltegger, 2019-07-09 Economics is a science that can contribute substantial powerful and fresh insights This book collects essays by leading academics that evaluate the scholarly importance of contemporary economic ideas and concepts thus providing valuable knowledge about the present state of economics and its progress This compilation of short essays helps readers interested in economics to identify 21st century economic ideas that should be read and remembered The authors state their personal opinion on what matters most in contemporary economics and reveal its fascinating and creative sides **Economics, Rational Choice and Normative Philosophy** Thomas Boylan, Ruvin Gekker, 2008-10-27 Leading international experts in the field of normative social choice theory complemented by experts in economic methodology and political science discuss the major developments arising from collaboration between experts in these cognate disciplines *Designing an All-Inclusive Democracy* Peter Emerson, 2007-05-05 This book describes the voting procedures by which majority rule may be replaced by a more consensual system of governance In a word such an

inclusive polity can be achieved by asking the voters or more usually their representatives in councils and parliaments to state their preferences so to facilitate the identification of that option which gains the highest average preference score

Institutions For Future Generations Iñigo González-Ricoy, Axel Gosseries, 2016-12-15 In times of climate change and public debt a concern for intergenerational justice should lead us to have a closer look at theories of intergenerational justice It should also press us to provide institutional design proposals to change the decision making world that surrounds us This book provides an exhaustive overview of the most important institutional proposals as well as a systematic and theoretical discussion of their respective features and advantages It focuses on institutional proposals aimed at taking the interests of future generations more seriously and does so from the perspective of applied political philosophy being explicit about the underlying normative choices and the latest developments in the social sciences It provides citizens activists firms charities public authorities policy analysts students and academics with the body of knowledge necessary to understand what our institutional options are and what they entail if we are concerned about today s excessive short termism **Designing**

Democracy Cass R. Sunstein, 2001-09-27 In modern nations political disagreement is the source of both the gravest danger and the greatest security writes Cass Sunstein All democracies face intense political conflict But is this conflict necessarily something to fear In this provocative book one of our leading political and legal theorists reveals how a nation s divisions of conviction and belief can be used to safeguard democracy Confronting one explosive political issue after another from presidential impeachment to the limits of religious liberty from discrimination against women and gays to the role of the judiciary Sunstein constructs a powerful new perspective from which to show how democracies negotiate their most divisive real world problems He focuses on a series of concrete concerns that go to the heart of the relationship between the idea of democracy and the idea of constitutionalism Illustrating his discussion with examples from constitutional debates and court cases in South Africa Eastern Europe Israel America and elsewhere Sunstein takes readers through a number of highly charged questions When should government be permitted to control discriminatory behavior by or within religious organizations Does it make sense to govern on the basis of popular referenda Can the right to have an abortion be defended Can we defend Internet regulation Should the law step in if children are being schooled in discriminatory preferences and beliefs Should a constitution protect rights to food shelter and health care Disputes over questions such as these can be fierce enough to pose a grave threat But in a paradox whose elaboration forms the core of Sunstein s book it is a nation s apparently threatening diversity of opinion that can ensure its integrity Extending his important recent work on the way deliberation within like minded groups can produce extremism Sunstein breaks new ground in identifying the mechanisms behind political conflict in democratic nations At the same time he develops a profound understanding of a constitutional democracy s system of checks and balances Sunstein shows how a good constitution fostering a republic of reasons enables people of opposing ethical and religious commitments to reach agreement where agreement is necessary while making it

unnecessary to reach agreement when agreement is impossible A marvel of lucid subtle reasoning **DESIGNING DEMOCRACY** makes invaluable reading for anyone concerned with the promises and pitfalls of the democratic experiment **Designing**

Social Systems in a Changing World Bela H. Banathy, 2013-11-22 In this original text reference Bela H Banathy discusses a broad range of design approaches models methods and tools together with the theoretical and philosophical bases of social systems design he explores the existing knowledge bases of systems design introduces and integrates concepts from other fields that contribute to design thinking and practice and thoroughly explains how competence in social systems design empowers people to direct their progress and create a truly participative democracy Based on advanced learning theory and practice the text's material is enhanced by helpful diagrams that illustrate novel concepts and problem sets that allow readers to apply these concepts **VAGES TERRAIN** Jerome Becker, Gunnar Grandel, Madlyn Miessgang, Mathias
