Badía Cabrera, 2001-08-31 Considering the Scotsman David Hume 1711-76 to be the most important influential and studied philosopher to have written in English Badia Cabrera philosophy U of Puerto Rico Rio Piedras could not resist the temptation to translate his 1966 *Le reflexion de David Hume en torno a la religion* from the Spanish into English He offers a significantly different view of his work on religion and natural theology than has appeared in the anglophone tradition Among the aspects he examines are the historical setting of his investigation of religion the ethical depreciation of religion and the rejection of miracles c Book News Inc **The Blackwell Companion to Sociology of Religion** Richard K. Fenn, 2008-06-09 The Blackwell Companion to Sociology of Religion is presented in three comprehensive parts Written by a range of outstanding academics the volume explores the current status of the sociology of religion and how it might look in future Explores the current status of the sociology of religion and how it might look at the beginning of the next millennium Traces the boundaries between sociology and other closely related disciplines such as theology and social anthropology Edited by one of the best known and most widely respected sociologists of religion Accessibly presented in three comprehensive parts **The Golden Bough: A Study of Magic & Religion** James George Frazer, 2020-12-17 The Golden Bough is a wide ranging comparative study of mythology and religion written by the Scottish anthropologist Sir James George Frazer The book documents and details the similarities among magical and religious beliefs around the globe Frazer attempted to define the shared elements of religious belief and scientific thought discussing fertility rites human sacrifice the dying god the scapegoat and many other symbols and practices whose influences had extended into 20th century culture His thesis is that old religions were fertility cults that revolved around the worship and periodic sacrifice of a sacred king Frazer proposed that mankind progresses from magic through religious belief to scientific thought The influence of The Golden Bough on contemporary European literature and thought is substantial **The golden bough; a study in comparative religion** sir James George Frazer, 1900 **Reflection and the Stability of Belief** Louis E. Loeb, 2010 A unifying theme of Loeb's work is epistemological that Descartes and Hume advance theories of knowledge that rely on a substantial naturalistic component adopting one or another member of a cluster of psychological properties of beliefs as the goal of inquiry and the standard for assessing belief forming mechanisms Thus Loeb shows a surprising affinity between the epistemologies of the two figures surprising because they are often thought of as polar opposites in this respect Descartes and Hume are unique in

that their philosophical texts are accessible beyond just a narrow audience in the history of philosophy their ideas continue to be a vital part of the field at large This volume will thus appeal to advanced students and scholars not just in the history of early modern philosophy but in epistemology and other core areas of the discipline
