Reforming Suburbia:

Reforming Suburbia Ann Forsyth, 2005-03-14 *Reforming Suburbia* is a fascinating book Forsyth examines the planned new towns of Columbia Irvine and The Woodlands through dozens of interviews with developers designers and residents as well as extensive archival research She tackles complex public and private investments and asks how negotiations proceeded between government and real estate developers all the while keeping an eye on the issues of race gender environmental sustainability and marketing This is required reading for anyone interested in the practice of American urban development Dolores Hayden author of *Building Suburbia Green Fields and Urban Growth 1820 2000* Ann Forsyth significantly enriches the fields of planning and architectural history with her thorough analysis of the social ecological and economic successes and shortcomings of these three prominent new communities She offers valuable insights and wonderfully captures the idealistic spirit of the late 1960s and early 1970s Frederick Steiner author of *Human Ecology* **New City Upon a Hill** Joseph Rocco Mitchell, David L. Stebenne, 2007-03-31 Published in anticipation of Columbias fortieth anniversary in 2007 this book showcases the history of one of the nations leading new towns Built from the brilliant plan developed by visionary designer James Rouse Columbias innovative design is the foundation for a unique community that has thrived for decades and flourishes today **The Death and Life of Main Street** Miles Orvell, 2012-10-01 For more than a century the term Main Street has conjured up nostalgic images of American small town life Representations exist all around us from fiction and film to the architecture of shopping malls and Disneyland All the while the nation has become increasingly diverse exposing tensions within this ideal In *The Death and Life of Main Street* Miles Orvell wrestles with the mythic allure of the small town in all its forms illustrating how Americans continue to reinscribe these images on real places in order to forge consensus about inclusion and civic identity especially in times of crisis Orvell underscores the fact that Main Street was never what it seemed it has always been much more complex than it appears as he shows in his discussions of figures like Sinclair Lewis Willa Cather Frank Capra Thornton Wilder Margaret Bourke White and Walker Evans He argues that translating the overly tidy cultural metaphor into real spaces as has been done in recent decades especially in the new urbanist planned communities of Elizabeth Plater Zyberk and Andres Duany actually diminishes the communitarian ideals at the center of this nostalgic construct Orvell investigates the way these tensions play out in a variety of cultural realms and explores the rise of literary and artistic traditions that deliberately challenge the tropes and assumptions of small town ideology and life *Desert Visions and the Making of Phoenix, 1860-2009* Philip VanderMeer, 2010-12-16 Whether touted for its burgeoning economy affordable housing and pleasant living style or criticized for being less like a city than a sprawling suburb Phoenix by all environmental logic should not exist Yet despite its extremely hot and dry climate and its remoteness Phoenix has grown into a massive metropolitan area This exhaustive study examines the history of how Phoenix came into being and how it has sustained itself from its origins in the 1860s to its present status as the nation s fifth largest city From

the beginning Phoenix sought to grow and although growth has remained central to the city's history its importance meaning and value have changed substantially over the years The initial vision of Phoenix as an American Eden gave way to the Cold War Era vision of a High Tech Suburbia which in turn gave way to rising concerns in the late twentieth century about the environmental social and political costs of growth To understand how such unusual growth occurred in such an improbable location Philip VanderMeer explores five major themes the natural environment urban infrastructure economic development social and cultural values and public leadership Through investigating Phoenix's struggle to become a major American metropolis his study also offers a unique view of what it means to be a desert city **Prairie Crossing** John Scott

Watson,2016-01-30 Carved out of century old farmland near Chicago the Prairie Crossing development is a novel experiment in urban public policy that preserves 69 percent of the land as open space The for profit project has set out to do nothing less than use access to nature as a means to challenge America's failed culture of suburban sprawl The first comprehensive look at an American conservation community Prairie Crossing goes beyond windmills and nest boxes to examine an effort to connect adults to the land while creating a healthy and humane setting for raising a new generation attuned to nature John Scott Watson places Prairie Crossing within the wider context of suburban planning revealing how two first time developers implemented a visionary new land ethic that saved green space by building on it The remarkable achievements include a high rate of resident civic participation the reestablishment of a thriving prairie ecosystem the reintroduction of endangered and threatened species and improved water and air quality Yet as Watson shows considerations like economic uncertainty lack of racial and class diversity and politics have challenged and continue to challenge Prairie Crossing and its residents

Flights of Imagination Sonja Dümpelmann,2014-09-19 In much the same way that views of the earth from the Apollo missions in the late 1960s and early 1970s led indirectly to the inauguration of Earth Day and the modern environmental movement the dawn of aviation ushered in a radically new way for architects landscape designers urban planners geographers and archaeologists to look at cities and landscapes As icons of modernity airports facilitated the development of a global economy during the twentieth and early twenty first centuries reshaping the way people thought about the world around them Professionals of the built environment awoke to the possibilities offered by the airports themselves as sites of design and by the electrifying new aerial perspective on landscape In *Flights of Imagination* Sonja Dümpelmann follows the evolution of airports from their conceptualization as landscapes and cities to modern day plans to turn decommissioned airports into public urban parks The author discusses landscape design and planning activities that were motivated legitimized and facilitated by the aerial view She also shows how viewing the earth from above redirected attention to bodily experience on the ground and illustrates how design professionals understood the aerial view as simultaneously abstract and experiential detailed and contextual harmful and essential Along the way Dümpelmann traces this multiple dialectic from the 1920s to the land camouflage activities during World War II and from the environmental and landscape planning initiatives of

the 1960s through today Metroburbia, USA Paul L Knox, 2008-06-19 Decades of economic prosperity in the United States have redefined the American dream Paul Knox explores how extreme versions of this dream have changed the American landscape Increased wealth has led America's metropolitan areas to develop into vast sprawling regions of metroburbia fragmented mixtures of employment and residential settings combining urban and suburban characteristics Upper middle class Americans are moving into larger homes in greater numbers which leads Knox to explore the relationship between built form and material culture in contemporary society He covers changes in home design real estate the work of developers and the changing wishes of consumers Knox shows that contemporary suburban landscapes are a product of consumer demand combined with the logic of real estate development mediated by design and policy professionals and institutions of governance Suburban landscapes not only echo the fortunes of successive generations of inhabitants Knox argues they also reflect the country's changing core values Knox addresses key areas of concern and importance to today's urban planners and suburban residents including McMansions traffic disasters house design homeowner's associations exclusionary politics and big box stores Through the inclusion of examples and photos Metroburbia USA creates an accessible portrait of today's suburbs supported by data anecdotes and social theory It is a broad interpretation of the American metropolitan form that looks carefully at the different influences that contribute to where and how we live today Building Home Eric John Abrahamson, 2013-02-28 This book is not only a biography of Howard F Ahmanson but also the story of the financing of the postwar housing boom and the tremendous growth of Los Angeles Americans have long believed that homeownership is fundamental to the strength of our democracy and the character of our people Victory in World War II combined with new government policies designed to stimulate mortgage lending sparked a tremendous surge in rates of homeownership in the 1950s With savings and loans providing more than half of the mortgages for these homes the industry enjoyed a golden era in its history especially in southern California Among its peers Home Savings Loan Association of Los Angeles was a giant By 1954 it had more customers and assets than any other thrift in America Through its real estate development entities the company played a leading role in the postwar suburban explosion that made LA the quintessential postmodern city As the crown jewel among a handful of mortgage related businesses launched and controlled by Howard F Ahmanson the company generated philanthropic capital to build L A's cultural centers and finance the campaigns of the region's leading politicians As a sun tanned yachtsman and a cigar smoking financier the Omaha born Ahmanson was both unique and representative of many of the business leaders of his era Like many elites Ahmanson shared a fundamental confidence in his ability to lead the nation to prosperity His death in 1968 came just as the era of deregulation was beginning In this new era the central role of the savings and loan in financing the American dream diminished and Home Savings was sold to help create one of the biggest branch banks in America Washington Mutual **The Routledge Companion to the Suburbs** Bernadette Hanlon, Thomas Vicino, 2018-09-03 The Routledge Companion to the Suburbs provides one of the most comprehensive

examinations available to date of the suburbs around the world International in scope and interdisciplinary in nature this volume will serve as the definitive reference for scholars and students of the suburbs This volume brings together the leading scholars of the suburbs researching in different parts of the world to better understand how and why suburbs and their communities grow decline and regenerate The volume sets out four goals 1 to provide a synthesis and critical appraisal of the historical and current state of understanding about the development of suburbs in the world 2 to provide a forum for a comprehensive examination into the conceptual theoretical spatial and empirical discontents of suburbanization 3 to engage in a scholarly conversation about the transformation of suburbs that is interdisciplinary in nature and bridges the divide between the Global North and the Global South and 4 to reflect on the implications of the socioeconomic cultural and political transformations of the suburbs for policymakers and planners The Routledge Companion to the Suburbs is composed of original scholarly contributions from the leading scholars of the study of how and why suburbs grow decline and transform Special attention is paid to the global nature of suburbanization and its regional variations with a focus on comparative analysis of suburbs through regions across the world in the Global North and the Global South Articulated in a common voice the volume is integrated by the very nature of the concept of a suburb as the unit of analysis offering multidisciplinary perspectives from the fields of economics geography planning political science sociology and urban studies

Soul City
Thomas Healy, 2021-02-02 A New York Times Book Review Editors Choice 2021 Hooks National Book Award Winner The fascinating forgotten story of the 1970s attempt to build a city dedicated to racial equality in the heart of Klan Country In 1969 with America's cities in turmoil and racial tensions high civil rights leader Floyd McKissick announced an audacious plan he would build a new city in rural North Carolina open to all but intended primarily to benefit Black people Named Soul City the community secured funding from the Nixon administration planning help from Harvard and the University of North Carolina and endorsements from the New York Times and the Today show Before long the brand new settlement built on a former slave plantation had roads houses a health care center and an industrial plant By the year 2000 projections said Soul City would have fifty thousand residents But the utopian vision was not to be The race baiting Jesse Helms newly elected as senator from North Carolina swore to stop government spending on the project Meanwhile the liberal Raleigh News Observer mistakenly claimed fraud and corruption in the construction effort Battered from the left and the right Soul City was shut down after just a decade Today it is a ghost town and its industrial plant erected to promote Black economic freedom has been converted into a prison In a gripping poignant narrative acclaimed author Thomas Healy resurrects this forgotten saga of race capitalism and the struggle for equality Was it an impossible dream from the beginning Or a brilliant idea thwarted by prejudice and ignorance And how might America be different today if Soul City had been allowed to succeed
