Economic Analysis of Property Rights Yoram Barzel, Douglas W. Allen, 2023-08-31 The standard neoclassical model of economics is

incapable of explaining why one form of organization arises over another It is a model where transaction costs are implicitly assumed to not exist however transaction costs are here defined as the costs of strengthening a given distribution of economic property rights and they always exist Economic Analysis of Property Rights is a study of how individuals organise resources to maximise the value of their economic rights over these resources It offers a unified theoretical structure to deal with exchange rights formation and organisation that traditional economic theory often ignores It explains how transaction costs can be reduced through reorganization and in the end how the distribution of property rights that exists is the one that maximizes wealth net of these transaction costs This necessary hypothesis explains much of the puzzling organizations and institutions that exist now and have existed in the past
