Experiential Christianity Ray Morose,2011 Experiential Christianity The main objective of this book is to illuminate the experiential arm of Christianity and by doing so redefine its devotional arm The devotional arm may guide but it takes the experiential arm to confirm By its nature experiential Christianity can bypass religious borders as it is not a dogma theology or a belief but a state of experiential being Hence can connect with and be beneficial to everyone regardless of his or her religious affiliation In this reevaluation of Christianity its living essence is revealed That exposure reveals an experiential pathway that unveils a practical foundation for a moral compass to steer one through the various hazards of daily living By learning to avoid those hazards your one and only purpose in life is revealed which is to discover the experiential reality of the statement made by Jesus that God is within you Everything else is secondary Meaning that experience is primary as it is used to define how one lives acts and thinks Based upon that experience a moral foundation naturally arises providing a cornerstone for ethical stances that cannot be manipulated or twisted by the many and varied seductive playthings engendered by self interest The depth of understanding released by the actual experiential discovery that God is within you changes your life forever you are truly reborn However that experience is not achievable by belief alone You must be willing to experientially delve into the core of your existence to discover the reality of that statement by Jesus Meaning you must experience it and not just believe it For that journey you will require intellectual knowledge of how all the internal components of your existence function and interrelate Without that knowledge you would easily become bewildered and distressed by the confusing quantity of ambiguous information that can block your pathway and in despair claim that experience is impossible Hence this book outlines all the tools you need to survive that internal journey and provides a map to begin your search Using both the tools and map is a personal decision that another cannot make for you You either do or do not There is no in between Does a non material entity referred to as God exist Yes Is it possible to logically confirm that assertion Yes Is a personal connection to that entity possible Absolutely That personal connection is not hiding You are hiding from it This book provides all the necessary information to realize that connection When that realization is a living reality it transforms belief into actuality establishing the cornerstone of an indestructible faith that underpins every thought and action in your life That experience adds experiential authenticity to your life confirming your eternal career has begun and that beginning has no end Four Studies in Teaching Grammar , *Connecting Content and Academic Language for English Learners and Struggling Students, Grades 2-6* Ruth Swinney,Patricia Velasco,2011-05-11 Create unit plans that will empower your EL students In this supremely practical book award winning principal Ruth Swinney and college professor Patricia Velasco focus on the careful planning needed to develop the academic language of all students For English learners

Translanguaging in EFL Contexts Michael Rabbidge,2019-03-26 The purpose of this book is to promote the value of translanguaging in EFL teaching contexts To date translanguaging has been discussed mostly in regards to US and European contexts This book will examine the teaching beliefs and practices of teachers within a South Korean elementary school context to evaluate the practices of current teachers who use translanguaging strategies when teaching This examination utilizes sociological theories of pedagogic discourse to discuss the consequences of language exclusion policies on the peninsula Using these theories it presents an argument for why EFL contexts like South Korea need to reevaluate their current policies and understandings of language learning and teaching By embracing translanguaging as an approach the author argues they will transform their traditional notions of language learning and teaching in order to view teachers as bilinguals and learners as emerging bilinguals rather than use terms of deficiency that have traditionally been in place for such contexts This book s unique use of sociological theories of pedagogic discourse supports a need to promote the translanguaging ideology of language teaching and learning

Teaching General Music Carlos R. Abril, Brent M. Gault, 2016-01-06

General music is informed by a variety of teaching approaches and methods. These pedagogical frameworks guide teachers in planning and implementing instruction. Established approaches to teaching general music must be understood, critically examined, and possibly reimagined for their potential in school and community music education programs. *Teaching General Music* brings together the top scholars and practitioners in general music education to create a panoramic view of general music pedagogy and to provide critical lenses through which to view these frameworks. The collection includes an examination of the most prevalent approaches to teaching general music, including Dalcroze, Informal Learning, Interdisciplinary, Kodály, Music Learning Theory, Orff-Schulwerk, Social Constructivism, and World Music Pedagogy. In addition, it provides critical analyses of general music and teaching systems in light of the ways children around the world experience music in their lives. Rather than promoting or advocating for any single approach to teaching music, this book presents the various approaches in conversation with one another. Highlighting the perceived and documented benefits, limits, challenges, and potentials of each, *Teaching General Music* offers myriad lenses through which to re-read, re-think, and re-practice these approaches.
