beautiful photographs of flora in their habitat Focusing on three broad habitats grassland open land and woodland he offers a biologically rigorous but engagingly readable account of our wild flowers and the places that nourish them He probes deep into the social and cultural history of wild flowers to tell a plethora of fascinating stories from the daffodil trains which transported Londoners to the golden triangle in Gloucestershire to experience woodlands carpeted with wild daffodils to the odd case of the Bath asparagus which isn't an asparagus at all but rather the edible flower buds of the rare spiked star of Bethlehem which used to grow in abundance around Bath
