Lawrence H. F. & John C. "Should United States Immigration Policy Be Changed?", AEI Press, 1980.

Lawrence & John thoroughly go through the immigration policy of US in their article. Immigration to the United States of America is the movement of non-residents to the United States (Robert, 2006). Authors comment that the immigration of people to the land has been the major reason of population growth and cultural change in United States even though foreign born population always constitutes less than 15 percent of the total US population, since its 1675 (the beginning of the immigration period). According to the authors, immigration has always been a problem and cause of debate throughout the American history. The social, economic, political and economic aspects of immigration has initiated numerous controversies, problems and debates about race, ethnicity, religion, economic benefits, settlement patterns, housing variations, job growth, impact on upward social mobility, nationalities, political loyalties, levels of criminality, moral values, work habits and several other issues. Lawrence and John (1980) say that immigration is a topic that the whole America is interested in. Even though traditionally, economic arguments and other social and political issues dominated the United States immigration debate, the recent arguments, demands and conflicts are highly polarized by various factors like the nationalist demands for the militarization of the US borders and other demands. Numerous arguments have crept into the political and social arena that compels United States to review its immigration policy.

Immigration to the United States of America is the movement of non-residents to the United States. This immigration of people to the land has been the major reason of population growth and cultural change in United States even though foreign born population always constitutes less than 15 percent of the total US population, since its 1675 (the beginning of the immigration period). However, Krikorian's article says that immigration has always been a problem and cause of debate throughout the American history. It is a known fact that the social, economic, political and economic aspects of immigration has initiated numerous controversies, problems and debates about race, ethnicity, religion, economic benefits, settlement patterns, housing variations,)

Labor Mobility and the World Economy Federico Foders,Rolf J. Langhammer,2011-09-18 An increasing number of landings of illegal migrants on the coast of Italy and Spain but also the recent riots car burnings and street battles that occurred all across France and that have been attributed to the migrant community seem to indicate that migration is likely to stay high on the European policy agenda for some time The flow of migrants from poor to rich countries does not however constitute a typically European problem V S public policy has also been facing a continued legal and illegal inflow of labor from different regions notably Mexico and other Latin American countries And similar developments in other advanced countries Australia Canada as well as in selected fast growing emerging markets in Eastern Europe and East Asia imply that these countries too are being compelled to adjust their public

policies in order to relieve migratory pressures and deal with their consequences The world economy already saw rising cross border labor flows in the 1990s and most forecasts predict that South North and South South migration will remain at relatively high levels over the next decades and possibly even turn into a major global challenge for policy makers in the 21st century

The Global Economic Crisis and Migration Christof Roos,Natascha Zaun,2018-10-18 Offering an in depth analysis of the impact of the economic crisis 2008 2012 on immigration movements and policies in the U S and Europe the analysis in this book is guided by two key questions What is the scope of change and did the crisis motivate this change or did other factors do so The contributions to the book find that the crisis had immediate effects on migration patterns migrants left crisis stricken countries naturalised in non crisis countries where they had previously settled or stopped migrating to formerly attractive countries which had been negatively affected by the crisis Whereas prior to the crisis the majority of migrants were highly skilled during the crisis there was a shift to vulnerable groups such as low skilled workers and women The book also finds that migration policies have indeed changed in times of crisis However these changes are neither exclusively restrictions nor liberalisations but encompass changes in both directions Despite the coincidence of many policy changes with the crisis these changes are not primarily induced by the crisis Instead politicians rhetorically used the crisis to promote both liberal and restrictive policy changes which were already in the making before the crisis This book was originally published as a special issue of the Journal of Ethnic and Migration Studies
