Emerging Threats to Tropical Forests William F. Laurance, Carlos A. Peres, 2006-10 Publisher Description *A Political Ecology of Forest Conservation in India* Amrita Sen, 2021-11-25 This book critically explores the political ecology of human marginalization wildlife conservation and the role of the state in politicizing conservation frameworks drawing on examples from forests in India The book specifically demonstrates the nuances within human environmental linkages by showing how environmental concerns are not only ecological in content but also political In India a large part of the forests and their surrounding areas were inhabited far before they were designated as protected areas and inviolate zones with the local population reliant on forests for their survival and livelihoods Thus socioecological conflicts between the forest dependents and official state bodies have been widespread This book uses a political ecology lens to explore the complex interplay between current norms of forest conservation and environmental subjectivities illustrating contemporary articulation of forest rights and the complex mediations between forest dependents and different state and non state bodies in designing and implementing regulatory standards for wildlife and forest protection It foregrounds the issues of identity migration and cultural politics while discussing the politics of conservation Through a political ecology approach the book not only is human centric but also makes significant use of the role of non humans in foregrounding the conservation discourse with a

particular focus on tigers The book will be of great interest to students and academics studying forest conservation human wildlife interactions and political ecology **Protecting Earth's Land** Valerie Rapp,2015-08-01 Nearly all living things depend on Earth's land and its resources to survive But did you know that people do many things that hurt the land The damage sometimes destroys forests which are home to diverse ecosystems and are important in producing oxygen and water And in many parts of the world damaged land produces less food less wood and less of many things that people need We must join together in the quest to find better ways to use and take care of Earth's land With engaging text and eye catching images plus a special Going Green section this book tells you all about Earth's land and what you can do to protect it
