## **Shrinking World:**

Smaller Cities in a Shrinking World Alan Mallach, 2023-06-13 Over the past hundred years the global motto has been more more more in terms of growth of population of the built environment of human and financial capital and of all manner of worldly goods This was the reality as the world population boomed during the 1960s and 1970s But reality is changing in front of our eyes Growth is already slowing down and according to the most sophisticated demographers the earth's population will begin to decline not hundreds of years from now but within the lifetimes of many of the people now living on the planet In Smaller Cities in a Shrinking World urban policy expert Alan Mallach seeks to understand how declining population and economic growth coupled with the other forces that will influence their fates particularly climate change will affect the world's cities over the coming decades What will it mean to have a world full of shrinking cities Does it mean that they are doomed to decline in more ways than simply population numbers or can we uncouple population decline from economic decay abandoned buildings and impoverishment Mallach has spent much of the last thirty or more years working in looking at thinking and writing about shrinking cities from Trenton New Jersey where he was director of housing and economic development to other American cities like Detroit Flint and St Louis and from there to cities in Japan and Central and Eastern Europe He has woven together his experience research and analysis in this fascinating realistic yet hopeful look at how smaller shrinking cities can thrive despite the daunting challenges they face

**A Shrinking World?** John Allen, Chris Hamnett, 1995 This is the second of a five book series which offers a forward looking broad based course in human geography The building blocks of a geographical imagination are presented through some of the principal forces that are shaping the world as it approaches the twenty first century Each book develops different aspects of the geographical imagination using a mixture of text and readings through which the authors teach what it is to think geographically The issues that are explored are at the forefront of global and local relations In recent years there has been much talk of a world that is progressively shrinking as developments in communications and travel increase the pace of life and disrupt our sense of distance For many this is the language of globalization of a world smaller in size characterized by closer ties and connections where places once thought of as far apart are no longer so This volume offers a critical introduction to these ideas one which requires us to rethink our notions of distance and movement as well as the very nature of social space itself Starting with the revolutions in transport and communications the book sets the context within which much of the discussion around the shrinking of the globe takes place The contributors then go on to examine the implications of a shrinking globe for the worlds of money and finance and for multinational and transnational firms and the role played by global cities Transnational pollution and global tourism are also explored for the manner in which they too often shrink the world in sometimes unexpected and unpredictable ways Throughout attention is drawn to the unevenness and inequality built into global relationships and processes

Containing a wealth of student friendly features this text provides an invaluable introduction to the issues and processes of the city in the Third World *Uneven Development* Neil Smith, 2010-01-25 In *Uneven Development* a classic in its field Neil Smith offers the first full theory of uneven geographical development entwining theories of space and nature with a critique of capitalist development Featuring pathbreaking analyses of the production of nature and the politics of scale Smith's work anticipated many of the uneven contours that now mark neoliberal globalization This third edition features an afterword updating the analysis for the present day *Tourism and Sustainability* Martin Mowforth, Ian Munt, 1998 Introduces students to the key concepts and challenges in this topical area by exploring and challenging the notion of sustainability and its relationship to contemporary tourism in the developing world *The Wealth & Poverty of Regions* Mario Polèse, 2010-01-15 As the world becomes more interconnected through travel and electronic communication many believe that physical places will become less important But as Mario Polèse argues in *The Wealth and Poverty of Regions* geography will matter more than ever before in a world where distance is allegedly dead This provocative book surveys the globe from London and Cape Town to New York and Beijing contending that regions rise or fall due to their location not only within nations but also on the world map Polèse reveals how concentrations of industries and populations in specific locales often result in minor advantages that accumulate over time resulting in reduced prices improved transportation networks increased diversity and not least of all buzz the excitement and vitality that attracts ambitious people *The Wealth and Poverty of Regions* maps out how a heady mix of size infrastructure proximity and cost will determine which urban centers become the thriving metropolises of the future and which become the deserted cities of the past Engagingly written the book

Černý, 2017-07-01 Middle Eastern instability is manifest externally in many ways by crises afflicting governing regimes the rise of political Islam terrorism revolution civil war increased migration and the collapse of many states This book examines the roots of this instability using a theoretically original and empirically supported historical sociological comparative analysis Up till now interpretations of the development of the post colonial Middle East have been dominated by two opposing theses The first views the region as backward unchanging and rigid the second as undergoing excessively rapid transformation This book offers an alternative perspective focusing on the highly uneven and unsynchronised pace of change in individual dimensions of Middle Eastern modernisation What we are seeing is 1 rapid socio demographic change a sharp increase in the population and the proportion of young people rapid urbanisation and the expansion of the media and education 2 slower and unstable economic change dependency on oil exports high unemployment and 3 slow or regressive political change erosion of the capacity to govern the absence of democratisation and liberalisation The theoretical model employed emerged from a critical reading of theories of modernisation and a concept of multiple modernities that also allows for an interrogation of the broader cultural religious and international political context of uneven modernisation in the Middle East This model is then tested empirically using the time series 1960 2010 of dozens of indicators covering the demographic social economic and political dimensions of the modernisation process In general the book does not concentrate on externally monitorable political actors and their rivalries as so often is the case Instead it focuses on the political rivalries of deep long term cumulative demographic social and economic change taking place beneath the surface It looks at changes that are not simply taking place in individual countries of the Middle East but since the end of the Second World War have affected the entire region and are responsible for the emergence of a Middle East completely different to that to which we were accustomed for many decades **IR** James M. **Blaming the Victim** Jairo Lugo-Ocando, 2014-12-20 Poverty it seems is a constant in today s news usually the result of famine exclusion or conflict In *Blaming the Victim* Jairo Lugo Ocando sets out to deconstruct and reconsider the variety of ways in which the global news media misrepresent and decontextualise the causes and consequences of poverty worldwide The result is that the fundamental determinant of poverty inequality is removed from their accounts The book asks many biting questions When and how does poverty become newsworthy How does ideology come into play when determining the ways in which poverty is constructed in newsrooms and how do the resulting narratives frame the issue And why do so many journalists and news editors tend to obscure the structural causes of poverty In analysing the processes of news production and presentation around the world Lugo Ocando reveals that the news makers agendas are often as problematic as the geopolitics they seek to represent This groundbreaking study reframes the ways in which we can think and write about the enduring global injustice of poverty
