Siberia Problems And Prospects For Regional Development:

Siberia Alan Wood, 2022-12-09 First published in 1987 *Siberia* examines the developments in the different sectors of Siberian economy and discusses the role of this vast and little known region in the Soviet Union's overall economic and defence strategy. It surveys historical developments and the geography of the region and focuses on the key problem areas such as manpower shortage, the difficulties involved in exploiting the territory's natural resources, internal communications including the construction of the Baikal Amur Railway in the Far East and considers Siberia's place in the context of international relations and the world economy. This book is a must read for scholars of Russian history, Russian geopolitics, European politics, international relations and European history.

Maritime Claims in the Arctic Erik Franckx, 2023-12-28 With the fundamental changes which occurred in the political structure of Europe and improved East-West relations in general, the Arctic has increasingly become the focal point of international attention during the last few years. Scientific research and environmental protection are areas which have already witnessed some form of international cooperation in the area. With this particular evolution in mind, a new look at the legal regime of navigation in the Arctic seems to be justified. While several other countries border on the Arctic, Canada and Russia have the most extensive shorelines and have shown keen interest in ensuring that their proper share of this area is not encroached by other countries. This book is thus generally restricted to an examination of the maritime boundaries that these states are claiming and the extent to which other states have recognized them. It also explores the need for greater international cooperation in this area, not only between the two main contenders but also with other countries that have shown a special interest in Arctic navigation and in the exploitation of resources of this area.

Negotiating the Arctic E.C.H. Keskitalo, 2004-06-01 This work draws upon the history of Arctic development and the view of the Arctic in different states to explain how such a discourse has manifested itself in current broader cooperation across eight statistics. Analysis based on organization developments from the late 1970s to the present shows that international region discourse has largely been forwarded through the extensive role of North American, particularly Canadian networks and deriving from their frontier-based conceptualization of the north.

The Blackwell Encyclopedia of the Russian Revolution Harold Shukman, 1994-12-05 This single volume is an authoritative and accessible guide to the background and progress of the Revolution, written by a team of over forty specialist contributors. Beginning with the radical movements of the mid-nineteenth century, the Encyclopedia covers the development of the revolutionary movement created by the intelligentsia, the condition of the peasants, that of the working class and of the army, the role of the Tsarist secret police, the agents provocateurs, the revolutionaries' own underground. A substantial section is devoted to the emergence of liberation movements among the national minorities of the borderlands. The Encyclopedia also considers the formation of Soviet institutions and examines too the emergence of revolutionary culture well before 1917, the avant-garde in art and theatre and the relationship to the revolution of three major Russian writers: Blok, Gorky and
