Wool is the only fibre able to naturally absorb VOCs and reduce their presence in the home, eradicating the risks to health and boosting wellness. These effects are observed just through the presence of wool bedding or carpets in the home. Not only does wool neutralise contaminants more quickly and completely than synthetic fibres, wool does not re-emit them, even when heated. Wool beds, bedding, mattresses and 100% wool carpets can continue to purify the air for up to 30 years.
