Black 1968 Timothy H. Parsons,2025-02-25 Initially the 1960s was a time of understandable optimism The civil rights movement and the legislation it inspired suggested an end to institutionalized racism in the United States while in the Global South the emergence of independent states anticipated political liberation and increased prosperity So when racial discrimination entrenched privilege cold war politics and fiscal reality dashed these hopes later in the decade the world experienced a wave of protests Conventional narratives of 1968

focus on student strikes revolutions and coups assassinations and the reactionary backlash that they inspired The chapters of Black 1968 reveal the imperfectly documented and heretofore unrecognized bonds that led peoples of African descent around the world to articulate new global conceptions of Blackness as a way to mount local challenges to racism segregation colonialism economic exploitation generational authority and cultural chauvinism This book will be of interest to general readers interested in the global 1968 as well as scholars of Blackness and global history

How To Do Politics With Art
Violaine Roussel, Anurima Banerji, 2016-10-26 A major issue in the relation of art to the rest of society is the question of how art penetrates politics From the perspective of most art scholars this is a question of aesthetics whether politics necessarily pollutes and debases the quality of the arts From the perspective of social science it has been primarily a question of meaning how political messages are conveyed through artistic media Recent work has begun to broaden the study of the arts and politics beyond semiosis and content focus Several strands of scholarship are converging around the general issue of the social relationships within which art takes political form that is how art and artists do politics This perspective of doing moves analysis beyond addressing the meaning of culture to focus on the ways that art is embedded in and intervenes in social relationships activities and institutions This volume brings together an interdisciplinary group of scholars from France and the United States to investigate these directions and themes by exploring the question of how to do politics with art from a comparative standpoint putting sociological approaches in conversation with other disciplinary prisms It will be of interest to scholars of social movements and politicization the sociology of art art history and aesthetics

Blackness Is Burning
TreaAndrea M. Russworm, 2016-10-03 Blackness Is Burning critiques the way the politics of recognition and representation appear in popular culture as attempts to humanize black identity through stories of suffering and triumph or tales of destruction and survival Blackness Is Burning is one of the first books to examine the ways race and psychological rhetoric collided in the public and popular culture of the civil rights era In analyzing a range of media forms including Sidney Poitier's popular films black mother and daughter family melodramas Bill Cosby's comedy routine and cartoon Fat Albert pulpy black pimp narratives and several aspects of post civil rights black American culture TreaAndrea M Russworm identifies and problematizes the many ways in which psychoanalytic culture has functioned as a governing racial ideology that is built around a flawed understanding of trying to recognize the racial other as human The main argument of Blackness Is Burning is that humanizing or trying to represent in narrative and popular culture that BlackLivesMatter has long been barely attainable and impossible to sustain cultural agenda But Blackness Is Burning makes two additional interdisciplinary interventions the book makes a historical and temporal intervention because Russworm is committed to showing the relationship between civil rights discourses on theories of recognition and how we continue to represent and talk about race today The book also makes a formal intervention since the chapter length case studies take seemingly banal popular forms seriously She argues that the popular forms and disreputable works are integral parts of our shared cultural knowledge

Blackness Is Burning's interdisciplinary reach is what makes it a vital component to nearly any scholar's library particularly those with an interest in African American popular culture film and media studies or psychoanalytic theory **Freedom**

Lechner, 2018-09-15

With the nation reeling from the cultural and political upheavals of the 1960s era imaginings of the white South as a place of stability represented a bulwark against unsettling problems from suburban blandness and empty consumerism to race riots and governmental deceit A variety of individuals during and after the civil rights era including writers journalists filmmakers musicians and politicians envisioned white southernness as a manly tradition loving communal authentic and often rural or small town notion that both symbolized a refuge from modern ills and contained the tools for combating them The South of the Mind tells this story of how many Americans looked to the country's most maligned region to save them during the 1960s and 1970s In this interdisciplinary work Zachary J Lechner bridges the fields of southern studies southern history and post World War II American cultural and popular culture history in an effort to discern how conceptions of a tradition bound timeless South shaped Americans views of themselves and their society's political and cultural fragmentations Wide ranging chapters detail the iconography of the white South during the civil rights movement hippies fascination with white southern life the Masculine South of George Wallace Walking Tall and Deliverance the differing southern rock stylings of the Allman Brothers Band and Lynyrd Skynyrd and the healing southernness of Jimmy Carter The South of the Mind demonstrates that we cannot hope to understand recent U S history without exploring how people have conceived the South as well as what those conceptualizations have omitted
