*Bargaining for Eden* Stephen Trimble, 2008-07-28 While open spaces in America are rapidly being destroyed as a result of greed hubris and neglect Stephen Trimble's *Bargaining for Eden* is a powerful call for us to more earnestly consider our solemn obligations as stewards of the Earth Combining remarkable investigative research with his skills as a poignant essayist Trimble has favored us with an extraordinary account that inspires as it challenges our values our commitment to action and our sense of connection with place community and the essence of who we are as inhabitants of this wondrous planet Rocky Anderson Former Mayor of Salt Lake City From Hetch Hetchy to Glen Canyon we mourn the sacred places in the west that have been bargained away for the American dream Stephen Trimble eloquently shows that these are not just conflicts over land but choices over which American dream we pursue as a nation What moves us to act What do we really value How shall we live together In this mature and poignant book Trimble urges passion and self awareness and reminds us that no conflict arises totally outside of oneself all of the things we fear in others may be possible in ourselves Peter Forbes Director Center for Whole Communities With this masterwork Stephen Trimble has given us the most reasoned and moving account of how and why the West becomes developed and its lands fragmented Rather than merely pointing the finger at developers or passive staffers in federal agencies he places the development issue in a larger cultural context asking us all to be full participants in the choices about how our lands and waters are ultimately managed As wise as it is heartbreaking Trimble's story challenges us to sign on to supporting a new ethics of land use in the West that will keep such tragedies from occurring so frequently in the future Gary Nabhan author of *Renewing America's Food Traditions and Cultures of Habitat* With *Bargaining for Eden* Stephen Trimble has given us both a piece of dogged investigative journalism and a soul searching confessional The shocking largely unreported story of Earl Holding and the Snowbasin land swap becomes in Trimble's heartfelt prose a metaphor for the way land is used and abused in the West But Stephen doesn't stop with the exposé He

weaves it into a thoughtful and thought provoking reverie on man's place in an increasingly threatened landscape. We are all part of the problem. And he writes hopefully we can with honest effort become part of the solution. Peter Shelton, author of *Climb to Conquer: The Untold Story of WWII's 10th Mountain Division Ski Troops*. Make no mistake, *Bargaining for Eden* is a brave and important book. It's a page turner of a story about powerful men, unspeakable wealth, and Olympic gold medal mountains. But it's also a jungle in the tradition of Upton Sinclair, a disturbing story of how politics and capitalism worked hand in hand against the common good and our commonwealth of wildlands. If we are ever to learn how to live on the land and at the same time protect its heart, maybe we can start here in Trimble's beloved Utah mountains. Kathleen Dean Moore, author of *The Pine Island Paradox*. **The Elusive Eden** Richard B. Rice, William A. Bullough, Richard J. Orsi, Mary Ann

Irwin, Michael F. Magliari, Cecilia M. Tsu, 2019-09-13 California is a region of rich geographic and human diversity. *The Elusive Eden* charts the historical development of California beginning with landscape and climate and the development of Native cultures and continues through the election of Governor Gavin Newsom. It portrays a land of remarkable richness and complexity settled by waves of people with diverse cultures from around the world. Now in its fifth edition, this up-to-date text provides an authoritative, original, and balanced survey of California history incorporating the latest scholarship. Coverage includes new material on political upheavals, the global banking crisis, changes in education and the economy, and California's shifting demographic profile. This edition of *The Elusive Eden* features expanded coverage of gender, class, race, and ethnicity, giving voice to the diverse individuals and groups who have shaped California. With its continued emphasis on geography and environment, the text also gives attention to regional issues, moving from the metropolitan areas to the state's rural and desert areas. Lively and readable, *The Elusive Eden* is organized in ten parts. Each chronological section begins with an in-depth narrative chapter that spotlights an individual or group at a critical moment of historical change, bringing California history to life. **Thomas Berry, Dreamer of the Earth** Ervin Laszlo, Allan Combs, 2011-01-27 A tribute to the visionary contributions and prophetic writings of Thomas Berry, spiritual ecologist and father of environmentalism. Contains 10 essays by eminent philosophers, thinkers, and scientists in the field of ecology and sustainability, including Matthew Fox, Joanna Macy, Duane Elgin, Sean Esbjorn Hargens, Ervin Laszlo, and Allan Combs. Calls for a transformation of consciousness to resolve today's global ecological and human challenges. Includes a little-known but essential essay by Thomas Berry. When cultural historian and spiritual ecologist Thomas Berry, described by *Newsweek* magazine as the most provocative figure among the new breed of eco-theologians, passed away in 2009 at age 94, he left behind a dream of healing the Earth community. In his numerous lectures, books, and essays, Berry proclaimed himself a scholar of the earth, a geologist, and diligently advocated for a return to Earth-based spirituality. This anthology presents 10 essays from leading philosophers, scientists, and spiritual visionaries, including Matthew Fox, Joanna Macy, Duane Elgin, Sean Esbjorn Hargens, Ervin Laszlo, and Allan Combs, on the genius of Berry's work and his quest to resolve our global ecological and spiritual challenges, as well as a little-known but

essential essay by Berry himself Revealing Berry s insights as far ahead of their time these essays reiterate the radical nature of his ideas and the urgency of his most important conclusion that money and technology cannot solve our problems rather we must reestablish the indigenous connection with universal consciousness and return to our fundamental spontaneous nature still evident in our dreams in order to navigate our ecological challenges successfully Congressional Record United States. *Analog Science Fiction/science Fact* ,1981 **Sacred Ground to Sacred Space** Rowena Pattee Kryder,1994-10 In her magnificent Sacred Ground to Sacred Space visionary artist Rowena Pattee Kryder weaves together the scientific and spiritual traditions to reveal how the sacred is inherent in nature and how we can get in touch with the qualities of subtle energy and light that are the power and codes for manifesting harmonious culture Water and the California Dream David Carle,2016-05-10 In the last one hundred years imported water has transformed the environment of the Golden State and its quality of life with land ownership patterns and real estate boosterism dramatically altering both urban and rural communities The key to this transformation has been expanded access to water from the Eastern Sierra the Colorado River and Northern California rivers Whoever brings the water brings the people wrote engineer William Mulholland under whose leadership the process of growth through irrigation began Now using first person voices of Californians to reveal the resulting changes author David Carle concludes that it may be time to stop drowning the California dream of the good life with imported water Using oral histories contemporary newspaper articles and autobiographies Carle explores the historic changes in California showing how imported water has shaped the pattern of population growth in the state Because water choices remain the primary tool for shaping California s future Carle also argues that it is possible to improve both the state s damaged environment and the quality of life if Californians will step out of this historic pattern and embrace limited water supplies as a fact of life in this naturally dry region Associations' Publications in Print ,1984 1981 in 2 v v 1 Subject index v 2 Title index Publisher title index Association name index Acronym index Key to publishers and distributors abbreviations

**Governing the Fragmented Metropolis** Christina D. Rosan,2016-10-18 Today the challenges facing our nation s metropolitan regions are enormous demographic change aging infrastructure climate change mitigation and adaptation urban sprawl spatial segregation gentrification education housing affordability regional equity and more Unfortunately local governments do not have the capacity to respond to the interlocking set of problems facing metropolitan regions and future challenges such as population growth and climate change will not make it easier But will we ever have a more effective and sustainable approach to developing the metropolitan region The answer may depend on our ability to develop a means to

govern a metropolitan region that promotes population density regional public transit systems and the equitable development of city and suburbs within a system of land use and planning that is by and large a local one If we want to plan for sustainable regions we need to understand and strengthen existing metropolitan planning arrangements Christina D Rosan observes that policy makers and scholars have long agreed that we need metropolitan governance but they have debated the best approach She argues that we need to have a more nuanced understanding of both metropolitan development and local land use planning She interviews over ninety local and regional policy makers in Portland Denver and Boston and compares the uses of collaboration and authority in their varying metropolitan planning processes At one end of the spectrum is Portland s approach which leverages its authority and mandates local land use at the other end is Boston s which offers capacity building and financial incentives in the hopes of garnering voluntary cooperation Rosan contends that most regions lie somewhere in between and only by understanding our current hybrid system of local land use planning and metropolitan governance will we be able to think critically about what political arrangements and tools are necessary to support the development of environmentally economically and socially sustainable metropolitan regions *Riverine Dreams* George Frazier,2025-10-03 The inspirational story of grassland rivers and the people who paddle and protect them The North American grasslands that once covered vast areas of the central United States are now our most endangered ecosystems But not far from any spot in the grasslands is a river Grassland rivers are as central to the story of prairies as bison and bluestem Defined as rivers that drain prairie watersheds these waterways are crucial to plains ecosystems and no less endangered than the grasslands surrounding them They are also enigmatic some are restricted by local access laws and others have simply been forgotten In any given year fewer than a dozen people might lay eyes on tens of thousands of miles of America s grassland rivers But as environmental writer George Frazier shows following their twists and turns is one of the best ways to experience the wild essence of the prairies *Riverine Dreams* invites us on a trip along eight grassland rivers including the Missouri the Niobrara and Purgatoire traversing their environmental and cultural histories and introducing us to the people who study paddle and conserve them This journey takes Frazier across the North American interior from Montana and Colorado to Nebraska and Missouri where he uncovers a remarkable movement to celebrate and preserve these natural treasures nothing less than a grassland river revival The first accessible introduction to these waters *Riverine Dreams* is a personal exploration of the rivers that are so vital to the health of the prairies **Our Children, Their Children** Darnell F. Hawkins,Kimberly Kempf-Leonard,2010-02-15 In *Our Children Their Children* a prominent team of researchers argues that a second rate and increasingly punitive juvenile justice system is allowed to persist because most people believe it is designed for children in other ethnic and socioeconomic groups While public opinion laws and social policies that convey distinctions between our children and their children may seem to conflict with the American ideal of blind justice they are hardly at odds with patterns of group differentiation and inequality that have characterized much of American history *Our Children Their*

Children provides a state of the science examination of racial and ethnic disparities in the American juvenile justice system. Here contributors document the precise magnitude of these disparities, seek to determine their causes, and propose potential solutions. In addition to race and ethnicity, contributors also look at the effects on juvenile justice of suburban sprawl, the impact of family and neighborhood bias in postarrest decisions, and mental health issues. Assessing the implications of these differences for public policy initiatives and legal reforms, this volume is the first critical summary of what is known and unknown in this important area of social research.
