Rendering Techniques 2001 S.J. Gortler, K. Myzskowski, 2012-12-06 This book contains the proceedings of the 11th
Eurographics Workshop on Rendering which took place from the 25 to the 27th of June 2001 in London United Kingdom
Over the past 11 years the workshop has become the premier forum dedicated to research in rendering Much of the work in
rendering now appearing in other conferences and journals builds on ideas originally presented at the workshop This year we
received a total of 74 submissions Each paper was carefully reviewed by two of the 28 international programme committee
members as well as external reviewers selected by the co chairs from a pool of 125 individuals In this review process all
submissions and reviews were handled electronically with the exception of videos submitted with a few of the papers The
overall quality of the submissions was exceptionally high Space and time constraints forced the committee to make some
difficult decisions In the end 29 papers were accepted and they appear here Almost all papers are accompanied color
images which appear at the end of the book The papers treat the following varied topics methods for local and global
illumination techniques for acquisition and modeling from images image based rendering new image representations
hardware assisted methods shadow algorithms visibility perception texturing and filtering Each year in addition to the
reviewed contributions the workshop includes invited presentations from internationally recognized experts **SIGGRAPH**

book contains the proceedings of the 10th Eurographics Workshop on Rendering which took place from the 21st to the 23rd
of June 1999 in Granada Spain Originally an outgrowth of the annual Eurographics meeting the workshop was organized by
a dedicated group of researchers who felt there was insufficient opportunity at Eurographics and Siggraph to exchange
ideas specifically on rendering Over the past 9 years the workshop has become renowned as an international watershed for top
quality work in this field attracting between 50 and 100 attendees each year to share their latest research This year we

received a total of 63 submissions Each paper was carefully reviewed by two of the 25 international programme committee members as well as two external reviewers selected by the co chairs from a pool of 71 individuals The programme committee and external reviewers are listed following the contents pages In this new review process all submissions and reviews were handled electronically with the exception of videos submitted with a few of the papers This streamlined the review process considerably while reducing the costs and confusion associated with courier delivery of hundreds of papers
