Sight And Sound Film Review Volume May 1992 To December 199:

The Beatles and Film Stephen Glynn, 2020-11-29 This concise yet comprehensive study explores the emblematic journey by four young men from Liverpool from the epicentre of teen led youth culture to the experimentation of the counterculture and beyond Beginning with the celebration of Britain's own youthquake in the joyous and genre shifting A Hard Day's Night 1964 the author delves into how the Beatles film work allows us to chart their subsequent musical maturation and retreat from the tribulations of stardom in Help their tentative attempts at improvised filming in the televised Magical Mystery Tour 1967 their acceptance of cartoon representations as leaders of the hippie counterculture in Yellow Submarine 1968 and the final implosion of their musical dynamic in the recording studios of Let It Be 1970 The book analyses how as they grew with their fanbase the Beatles films alternate stylistically between mimetic representation and allegorical interpretation and switch narratively between fan filled and welcoming worlds to films relaying introspection and isolation Offering an in depth case study of the successes and failures of British youth culture in a volatile decade The Beatles and Film is an engaging text for both scholars and general readers alike

American Culture in the 1960s Sharon Monteith, 2008-10-08 This book charts the changing complexion of American culture in one of the most culturally vibrant of twentieth century decades It provides a vivid account of the major cultural forms of 1960s America music and performance film and television fiction and poetry art and photography as well as influential texts trends and figures of the decade from Norman Mailer to Susan Sontag from Muhammad Ali's anti war protests to Tom Lehrer's stand up comedy from Bob Dylan to Rachel Carson and from Pop Art to photojournalism A chapter on new social movements demonstrates that a current of conservatism runs through even the most revolutionary movements of the 1960s and the book as a whole looks to the West and especially to the South in the making of the sixties as myth and as history

 cinematic projects including the film d art movement the postwar avant gardes various Asian new waves the New Hollywood
 and American indie films but until now no one has actually defined what art cinema is Turning the traditional highbrow
 notion of art cinema on its head Theorizing Art Cinemas takes a flexible inclusive approach that views art cinema as a
 predictable way of valuing movies as art movies an activity that has occurred across film history and across film subcultures
 rather than as a traditional genre in the sense of a distinct set of forms or a closed historical period or movement David
 Andrews opens with a history of the art cinema super genre from the early days of silent movies to the postwar European
 invasion that brought Italian Neorealism the French New Wave and the New German Cinema to the forefront and led to the
 development of auteur theory He then discusses the mechanics of art cinema from art houses film festivals and the academic
 discipline of film studies to the audiences and distribution systems for art cinema as a whole This wide ranging approach
 allows Andrews to develop a theory that encompasses both the high and low ends of art cinema in all of its different aspects
 including world cinema avant garde films experimental films and cult cinema All of these art cinemas according to Andrews
 share an emphasis on quality authorship and anticommercialism whether the film in question is film festival favorite or a
