Triggs,2008-07-31 International frontiers and boundaries separate land rivers and lakes subject to different sovereignties Frontiers are zones of varying widths and they were common many centuries ago By 1900 frontiers had almost disappeared and had been replaced by boundaries that are lines The divisive nature of frontiers and boundaries has formed the focus of inter disciplinary studies by economists geographers historians lawyers and political scientists

Scholars from these disciplines have produced a rich literature dealing with frontiers and boundaries. The authors surveyed this extensive literature and the introduction reveals the themes which have attracted most attention. Following the introduction, the book falls into three sections. The first section deals systematically with frontiers, boundary evolution, and boundary disputes. The second section considers aspects of international law related to boundaries. It includes chapters dealing with international law and territorial boundaries, maps as evidence of international boundaries, and river boundaries and international law. The third section consists of seven regional chapters that examine the evolution of boundaries in the Americas, the Middle East, Africa, Asia, Europe, islands off Southeast Asia, and Antarctica.

Bordering the Middle East

Daniel Meier, 2020-05-21. This volume focuses on the influence that borders in the Middle East can have on actors' identity building as well as how local, national, or transnational actors re-define borders and boundaries. The Middle East is facing a political crisis revealed by the Arab uprisings that is affecting states' borders in a paradoxical way while local communal or tribal dissent tends to contest international borders. States are trying to affirm their control over national territory in building border fences. Focusing on borders in their materiality as well as their symbolic dimensions, their representations may help with reappraising the region's own history, the local national specificities as well as regional/global constraints affecting borderlands and those who cross borders, be they workers, migrants, or jihadists. In this book, six case studies will provide insights on state-community relationships through the lens of border issues in the Levant and the Gulf. The theoretical framework provided by the border studies conceptual tools allows authors to delve into the process of bordering, de-bordering, and re-bordering, which is affecting the region, raising questions on sovereignty, authority, and the political legitimacy of the regimes. This book was originally published as a special issue of *Geopolitics*.

Historical Dictionary of Saudi Arabia

J.E. Peterson, 2020-03-06. The Kingdom of Saudi Arabia now has been under the spotlight of Western curiosity for more than 80 years. More than 15% of the world's total oil reserves lie underneath Saudi Arabia, and in the early 1990s the kingdom became the world's largest crude oil producer. Not surprisingly, a world highly dependent on oil regards the desert kingdom as an area of intense strategic concern, as reflected in the coalition of forces assembled on Saudi soil to oust Iraq from Kuwait in 1991. Also, it played a major role in the invasion of Saddam Husayn's Iraq in 2003 and shares concern with the West over Iran's nuclear intentions throughout the 21st century. This third edition of *Historical Dictionary of Saudi Arabia* contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 1,000 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent resource for students, researchers, and anyone wanting to know more about Saudi Arabia.

The Middle East and North Africa

Alasdair Drysdale, 2024-10-15. This contemporary text, the first in over a decade on the region, presents the geography of the Middle East and North Africa defined as the Arab World, Israel, Turkey, Iran, and Afghanistan. Thematically organized, the book's eleven chapters focus on the region's physical and climatic setting, demographic characteristics, migration patterns,

The United Arab Emirates Yearbook 2006, 2006 United Arab Emirates Yearbooks *Mirrored Loss* Gabriele vom Bruck, 2019-01-01 *Mirrored Loss* tells the story of Amat al Latif al Wazir only daughter of Abdullah al Wazir the leader of Yemen's constitutional movement of the mid twentieth century for democratisation of the autocratic imamate Her relationship with her adored father who was accused of treason takes centre stage in this biographical narrative Amat al Latif enjoyed a privileged childhood in a high ranking family at the heart of Yemeni politics yet the failed revolt of 1948 was the family's downfall leaving her and other close relatives exposed to social indignities and privation She then spent many years in exile where she suffered a personal calamity that compounded the earlier catastrophe Through one family's story Gabriele vom Bruck explores how violence translates into tragedy in the personal realm and how individual lives and larger cultural and political worlds intersect in Yemen Her narrative makes these tragic events compellingly tangible especially at the level of gendered subjectivity female Yemenis have been either unknown to or deemed insignificant by most male historians of this period *Mirrored Loss* is a significant step in righting that omission

Developing countries in the tropics have different natural conditions and different institutional and financial situations to industrialized countries. However, most textbooks on highway engineering are based on experience from industrialized countries with temperate climates and deal only with specific problems. *Road Engineering for Development* published as *Highway and Traffic Engineering in Developing Countries* in its first edition provides a comprehensive description of the planning, design, construction, and maintenance of roads in developing countries. It covers a wide range of technical and non-technical problems that may confront road engineers working in this area. The technical content of the book has been fully updated and current development issues are focused on. Designed as a fundamental text for civil engineering students, this book also offers a broad practical view of the subject for practising engineers. It has been written with the assistance of a number of world-renowned specialist professional engineers with many years' experience in Africa, the Middle East, Asia, and Central America.
