Handbook of Contemporary Sociological Theory Seth Abrutyn, 2016-06-22

This Handbook provides the hidden common threads that tie sociological inquiry together and featuring eminent scholars it separates itself from its predecessors in substance and organization Rather than rehashing old debates or longingly gazing at the past this book presents sociologists with new ways of conceptualizing the organization and presentation of sociological theory At the heart of this Handbook's vision is the twin goals of making theory a viable enterprise by reconceptualizing how we teach theory and keeping theory closely tied to its empirical applications Three strategies are offered 1 Elucidating how classic issues like integration or interaction are interrogated today 2 Presenting a coherent vision of the social levels of reality that theorists work on such as communities groups and the self as well as how the coherence of these levels speaks to the macro micro link and 3 Theorizing the social world rather than celebrating theorists or theories that is one can look at how theory is used holistically to understand the constraints the social world places on our lived experience or the dynamics of social change Hence in the second decade of the 21st century it has become clear that sociology is at a crossroads as the number of theorists and amount of theory available is increasingly unmanageable and unknowable by the vast majority of professionals and students As such this Handbook of Contemporary Sociological Theory presents the novice and the expert with the a roadmap for traversing this crossroad and building a more coherent robust and cumulative sociology High School and College Text Books American Book Company, 1913 Medical Books and Serials in Print, 1983 *The Psychology of Communication* W. Lambert Gardiner, 2008-12 This book is designed to capture the complexity of the vast domain of the psychology of communication by adding overlays of different logical approaches to the topic Each chapter will focus on a different approach Chapters 2 behavioristic approach 3 humanistic approach and 4 interactionist approach are presented as thesis antithesis and synthesis They focus respectively on input stored and feedback information Chapters 5 phylogenetic approach and 6 ontogenetic approach place psychology firmly where it belongs as the study of organisms rather than of mechanisms Development from animal to human and from child to adult is emancipation from tyranny of environment Chapter 7 pathological approach explores functional disorders of person in environment since the nervous system knows its environment Chapter 8 phenomenological approach deals with the further complexity that the nervous system can be viewed from the inside experience as well as from the outside behavior Chapters 9 simulation approach and 10 mediational approach focus on artificial intelligence AI and intelligence amplification IA Computers can be used to emulate or to extend human intelligence Chapters 11 biological approach and 12 sociological approach deal with the complexities arising from the fact that the nervous system is embedded in a hierarchy of systems within systems They focus on emergence from the level below

psychology biology and reduction from the level above sociology Each approach will cast some light on the topic from its peculiar perspective The cumulative effect will be to illuminate the domain in all its complexity Let them all tell you what happened Mercedes Pescador,2020-12-01 These pages have been written by authors from the five continents from March to May 2020 and they make up an emotional X ray of what they were thinking and feeling while faced by a threat to their own lives Artists teachers mayors pensioners ambassadors homemakers diplomats writers jobless nurses of all ages and origins they all string their words together and write about love fear family time or future There are some who express themselves with a poem an entry in a diary a story or a critical reflection and others with an illustration or a photograph Together they create an intimate and diverse testimony of how a pandemic the one in 2020 changed who we are as human beings
