Looking At Cities:

Looking at Cities Allan B. Jacobs, 1985 Allan Jacobs has written a city planning book for everyone with a passion for urban environments His message conveyed in word and vivid image is that the people who make changes in cities base their decisions upon what they see and that their visions and actions which affect the lives of millions have too often been faulty This book is about how to look at and understand urban environments In order to plan sensitively the city and regional planner must walk in look at wonder about and simply enjoy cities Careful observation is a crucial tool for the kind of analysis and questioning necessary to achieve good planning Through observation the city planner and urban activist can learn when an area was built for whom it was built who lives there now how it has changed and how it might be improved for present and future inhabitants Jacobs shows us how to read cities by identifying and discussing the many visual clues and their various meanings in different environments Case studies of American and European cities San Jose San Francisco Cincinnati Bologna Rome and over two hundred striking photographs drawings and maps by the author present ways to read the environment that will prove indispensable for urban planners and will delight all city watchers **Why Cities Look the**

Way They Do Richard J. Williams, 2019-08-08 We tend to think cities look the way they do because of the conscious work of architects planners and builders But what if the look of cities had less to do with design and more to do with social cultural financial and political processes and the way ordinary citizens interact with them What if the city is a process as much as a design Richard J Williams takes the moment construction is finished as a beginning tracing the myriad processes that produce the look of the contemporary global city This book is the story of dramatic but unforeseen urban sights how financial capital spawns empty towering skyscrapers and hollowed out ghettos how the zoning of once illicit sexual practices in marginal areas of the city results in the reinvention of culturally vibrant gay villages how abandoned factories have been repurposed as creative hubs in a precarious postindustrial economy It is also the story of how popular urban clichés and the fictional portrayal of cities powerfully shape the way we read and see the bricks concrete and glass that surround us Thought provoking and original **Why Cities Look the Way They Do** will appeal to anyone who wants to understand the contemporary city shedding new light on humanity's greatest collective invention Cities and Photography Jane Tormey, 2013-01-17

Interrupted Shirley Jordan,Christoph Lindner,2016-02-25 *Cities Interrupted* explores the potential of visual culture in the form of photography film performance architecture urban design and mixed media to strategically interrupt processes of globalization in contemporary urban spaces Looking at cities such as Amsterdam Beijing Doha London New York and Paris the book brings together original essays to reveal how the concept of interruption in global cities enables new understanding of the forms of space experience and community that are emerging in today s rapidly transforming urban environments The idea of interruption addressed in this book refers to deliberate interventions in the spaces and communities of contemporary cities interventions that seek to disrupt or destabilize the experience of everyday urban life through creative practice Interruption is used as an analytic and conceptual tool to challenge and explore alternatives to the narratives of speed hyper mobility rapid growth and incessant exchange and flow that have dominated critical thinking on global cities Bringing art and creative practice into the centre of discussions about the future of cities alongside discussions of development design justice health sustainability technology and citizenship this book is essential reading for anyone working at the intersections of a range of urban cultural and visual fields including urban studies urban design and architecture visual studies cultural studies media studies art history and social and cultural geography

The Venice Variations Sophia Psarra,2018-04-30 From the myth of Arcadia through to the twenty first century ideas about sustainability how we imagine better urban environments remain persistently relevant and raise recurring questions How do cities evolve as complex spaces nurturing both urban creativity and the fortuitous art of discovery and by which mechanisms do they foster imagination and innovation While past utopias were conceived in terms of an ideal geometry contemporary exemplary models of urban design seek technological

solutions of optimal organisation The Venice Variations explores Venice as a prototypical city that may hold unique answers to the ancient narrative of utopia Venice was not the result of a preconceived ideal but the pragmatic outcome of social and economic networks of communication Its urban creativity though came to represent the quintessential combination of place and institutions of its time Through a discussion of Venice and two other works owing their inspiration to this city Italo Calvino's Invisible Cities and Le Corbusier's Venice Hospital Sophia Psarra describes Venice as a system that starts to resemble a highly probabilistic algorithm that is a structure with a small number of rules capable of producing a large number of variations The rapidly escalating processes of urban development around our big cities share many of the motivations for survival shelter and trade that brought Venice into existence Rather than seeing these places as problems to be solved we need to understand how urban complexity can evolve as happened from its unprepossessing origins in the marshes of the Venetian lagoon to the model city that endured a thousand years This book frees Venice from stereotypical representations revealing its generative capacity to inform potential other Venices for the future **First Concurrent**

Moorish Cities in Spain Catherine Gasquoine Hartley, 1906 **The Cities and Bishoprics of Phrygia** Sir William Mitchell Ramsay, 1895 **A Tale of Two Cities** Charles Dickens, 1894 *Cities in the Sand* Kenneth D. Matthews, Alfred W. Cook, 2018-12-02 Today the ancient Roman towns of Leptis Magana and Sabratha on the Mediterranean coast of Libya attract only a few curious travelers But two thousand years ago they were thriving commercial and agricultural centers whose value to Rome was measured by the wealth of produce shipped annually to the cities of the Empire This volume is primarily an introduction to the personality of these two towns recovered by archaeologists from the burying sands only in relatively recent years The text offers a concise and informative survey of the history of the region known as Tripolitania and examines the cultural and social life of Leptis Magna and Sabratha as reflected in the magnificent ruins depicted in the accompanying plates The first chapter provides an understanding of Roman government and organization in Africa from the time of Scipio's destruction of Carthage in 146 B.C. until the beginning of Mohammedan rule in 698 A.D. This discussion gives perspective to the life of Leptis Magna and Sabratha by placing it in context with Roman Africa in general explaining the various political divisions of the Roman provinces as well as the manner of civil and military administration under early imperial Roman Vandal and Byzantine rule The second and third chapters deal respectively with the particular ruins of the two towns Although both Leptis Magana and Sabratha unlike their sister city Oea or modern Tripoli succumbed to the smothering weight of drifting sand dunes they are made to live again in the pages of this volume Kenneth Matthews text is an excellent summary of life in Roman times while the photographs by Alfred Cook provide views unsurpassed in beauty and clarity of detail of the buildings and art that once flourished along the rim of the Mediterranean Sea **Cities and Stability** Jeremy L.
