Outsourcing and Service Work in the New Economy José-Luis Álvarez-Galván,2012-03-15 This book examines the impact of outsourcing on workers and their employment conditions in the new economy To do so the call centre industry in Mexico City is analysed through a large number of in depth interviews with workers and managers available statistics and visits to leading firms in the sector The case of call centres is paradigmatic as it is often seen as a flag ship industry of the new economy rapidly growing and subject to high pressures for costs reduction The Mexican experience is crucially relevant to understand employment conditions in a weak institutional setting where labour protection is low and business competition intense Overall outsourcing has gained popularity as a mechanism to deal with the uncertainty of increasingly challenging business environments Nonetheless the practice of outsourcing also raises important concerns This book identifies those managerial practices which have a substantial impact on workers and their employment conditions such as job designs

customer segmentation non standard contracts intensified supervision union avoidance limited career opportunities and strict social divisions in the workplace These findings also suggest that a number of practices that were common in the old economy are still dominant in the organisation of work in the twenty first century The book is a useful reference for scholars and students concerned with employment and labour studies economic development and globalisation New Economic Realities United States. Congress. House. Committee on Small Business,1988 **The New Economy** ,1984 **Governing Work and Welfare in a New Economy** Jonathan Zeitlin,David M. Trubek,2003 This book examines the common challenges confronting the European Union and the United States as they reconfigure work and welfare in a new economy and struggle to develop effective and legitimate governance arrangements Chapters by leading European and American scholars demonstrate that despite institutional and political differences the EU and the US face similar problems created by changes in productive organization employment patterns household structures and social risks They likewise face similar problems of coordinating reforms across interdependent policy domains and levels of governance each involving a multiplicity of public and private actors Because the issues are complex the environment uncertain and ready made solutions unsatisfactory policy makers in Europe and the US have increasingly recognized the need to accept diversity encourage experimentation foster collaborative problem solving and link multiple levels of governance The result has been a proliferation of new forms of experimentalist governance based on various combinations of devolved decision making information pooling and performance comparison deliberative exploration of promising solutions or good practices and redefinition of policy objectives in light of accumulated experience Europeans are systematically studying and debating each others policies and practices through the Open Method of Coordination while American states and localities are likewise developing new mechanisms for information sharing and horizontal comparison Hence there is now an opportunity to expand the process of mutual learning to the transatlantic region as a whole Governing Work and a Welfare in a New Economy contributes to this project by tracing parallel trends in governance and showing how new policy solutions are emerging from such experimentation The book s innovative interdisciplinary approach and up to date coverage of current transformations in work welfare and governance on both sides of the Atlantic will make it required reading for scholars students and policy makers alike **The President's New Economic Program** United States. If Mayors Ruled the World Benjamin R. Barber,2013-11-05 In the face of the most perilous challenges of our time climate change terrorism poverty and trafficking of drugs guns and people the nations of the world seem paralyzed The problems are too big for governments to deal with Benjamin Barber contends that cities and the mayors who run them can do and are doing a better job than nations He cites the unique qualities cities worldwide share pragmatism civic trust participation indifference to borders and sovereignty and a democratic penchant for networking creativity innovation and cooperation He

demonstrates how city mayors singly and jointly are responding to transnational problems more effectively than nation states mired in ideological infighting and sovereign rivalries The book features profiles of a dozen mayors around the world making a persuasive case that the city is democracy's best hope in a globalizing world and that great mayors are already proving that this is so

The Unmanageable Consumer Yiannis Gabriel, Tim Lang, 2015-09-21 The Unmanageable Consumer has long been one of my favorite books in the sociology of consumption This long overdue third edition has updated and revised the basic argument in many ways Most importantly it now offers a new chapter on the consumer as worker or more generally the prosumer Assign it to your classes I have and will again and read it for your edification George Ritzer Distinguished University Professor University of Maryland USA Western style consumerism is often presented as unstoppable yet its costs mount and its grip on consumer reality weakens In this 20th Anniversary edition Gabriel and Lang restate their thesis that consumerism is more fragile and unmanageable than is assumed by its proponents Consumerism has been both stretched and undermined by globalization the internet social media and other cultural changes Major environmental threats debt squeezed incomes and social inequalities now temper Western consumers appetite for spending The 20th century Deal first championed by Henry Ford of more consumption from higher waged work looks tattered This edition of The Unmanageable Consumer continues to explore 10 different consumer models and encourages analysis of contemporary consumerism It looks at the spread of consumerism to developing countries like India and China and considers the effects of demographic changes and migration and points to new features such as consumers taking on unwaged work New to this edition Coverage of new phenomenon such as social media and emerging markets Explores contemporary topics including the occupy movement and horsemeat scandal A new chapter on the consumer as worker This is a remarkable and important book The new edition updates consumer cultural studies to take into account austerity politics and the economic crisis and the impact these have had on how we think about and experience everyday practices of shopping and consuming The authors also build on and maintain the lively and challenging argument from the previous volumes which sees the consumer as an unstable space for a multiplicity of often contradictory responses which can unsettle the various strategies on the part of contemporary capitalism to have us buy more Angela McRobbie Goldsmiths University of London The book exemplifies how social science should be engaged insightful imaginative scholarly and highly socially and politically relevant Strongly recommended to students academics as well as all people interested in understanding our time and themselves in an age of consumerism and false promises Mats Alvesson Professor of Business Administration Lund University Sweden
