A unifying force greater than art, literature, religion, or science, Professor Dasgupta describes philosophy as the most important achievement of Indian thought, arguing that an understanding of its history is necessary to appreciate the significance and potentialities of India's complex culture. Volume I offers an examination of the Vedas and the Brahmanas, the earlier Upanishads, and the six systems of Indian philosophy. **Also a History of Philosophy, Volume 1** Jürgen Habermas, 2023-08-23 This is the first volume of a ground-breaking new work by Jürgen Habermas on the history of philosophy. In this major new work, Habermas sets out the ideas that inform his systematic account of the history of Western philosophy as a genealogy of postmetaphysical thinking. His account goes far beyond a vindication of the enduring relevance of philosophical reflection founded on communicative reason as a source of orientation in the modern world. He contrasts this conception with prominent diagnoses of the supposed crisis of Enlightenment reason and culture that seeks redemption in the affirmation of traditional religious authority. Schmitt: the timeless validity of Greek metaphysics. Strauss: a numinous conception of nature. Levinas: an occurrence of being that speaks to us from beyond the mists of pre-Socratic thought. Heidegger: Habermas situates Western philosophy in relation to traditions of thought founded in the major worldviews.

Judaism Buddhism Confucianism and Taoism that continue to shape contemporary culture and civilization At the same time he lays the groundwork for his analysis in the later volumes of the constitutive role played by the discourse on faith and knowledge in the development of Western philosophy which is the result of the unique symbiosis that Christianity entered into with Greek thought with the Christianization of the Roman Empire Far from raising claims to exclusivity completeness or closure Habermas s history of philosophy published in English in three volumes opens up new lines of research and reflection that will influence the humanities and social sciences for decades to come

The Authenticity of the Early Buddhist

Texts Bhikkhu Sujato,Bhikkhu Brahmali,2014-12-01 Are there any authentic Buddhist texts If so what are they These are questions of tremendous spiritual and historical interest about which there is a range of opinions that often appear to be irreconcilable Traditionalists insist that the texts were spoken by the Buddha in the most literal of senses while sceptics assert that we cannot know anything about the Buddha for certain and further that the notion of authenticity is irrelevant or pernicious Most academic scholars of early Buddhism cautiously affirm that it is possible that the early Buddhist texts as contained in the Sutta and Vinaya Pitaka contain some authentic sayings of the Buddha A sympathetic assessment of relevant evidence by the authors of this book shows that this is a drastic understatement and that it is very likely that the bulk of the sayings in the texts that are attributed to the Buddha were actually spoken by him Rarely has the question of authenticity of the Buddhist texts been systematically investigated Seeing the lack of an easily accessible summary of the evidence the authors assembled this survey

Katherine Wills Perlo, 2009 Through close readings of Jewish Christian Islamic and Buddhist texts Katherine Wills Perlo proves that our relationship with animals shapes religious doctrine particularly through the tension between animal exploitation and the bonds of kinship She pinpoints four different strategies for coping with this conflict The first is aggression in which a divinely conferred superiority or karma justifies animal usage The second is evasion which emphasizes benevolent aspects of the human animal relationship within the exploitative structure such as the image of Jesus as a good shepherd The third is defense which acknowledges the problematic nature of killing leading many religions to adopt a propitiation mechanism such as apologizing for sacrifice And the fourth is effective defensive which recognizes animal abuse as inherently unethical As humans feel more empathy toward animals Perlo finds that adherents revise their interpretations of religious texts Preexisting ontologies such as Christianity's changing God or Buddhism's principle of impermanence along with advances in farming practices and technology also encourage changes in treatment As cultures begin to appreciate the different types of perception and consciousness experienced by nonhumans definitions of reality become complicated and humans lean more toward unitary accounts of shared existence These evolving attitudes exert a crucial influence on religious thought Perlo argues moving humans ever closer to a nonspeciesist world **Isis**, 1928 Brief table of contents of vols I XX in v 21 p 502 618 **Old Brāhmī Inscriptions in the Udayagiri and Khandagiri Caves** Beni Madhab Barua, 1929
