Surviving and Thriving in Waves of Change Duke Rohe, Dutch Holland, 2012-01-20 This book can help you and your organization prosper during these times of change in the healthcare industry This book will show you how to excel at leading change which is an absolute requirement for executive success and the only way that organizations will be able to not only survive but also thrive in the days ahead The healthcare executives who are successful

in the worlds of today and tomorrow will be the ones who can look at waves of change and see opportunity who can design a vision and strategy for a more positive future for their organization and who can implement their designs on target on time and on budget by capitalizing on the strengths of their organizations and their bright and dedicated associates who are devoted to perfect healthcare You dont have to be afraid of change any longer Dutchs work offers entertaining and simple solutions that will help you move swiftly and efficiently through the growing pains of organizational change says Ken Blanchard author of The Secret and The One Minute Manager

How Managers Can Thrive in Waves of Change Dutch Holland, Deborah Salvo, 2012-06-20 Thriving in Times of Increasing Change Never before have organizations faced an environment as turbulent and as difficult as this one Businesses must change the way they are doing business now to a new way that will work for them in the future While major organizational change was once the exception it is now the rule and organizations will have to be very good at organizational change to thrive in the new business environment Profound changes are on the way Todays businesses are bracing for change Waves of regulatory requirements are coming in increasing amounts and intensity Competition is more intense and coming from every direction Customers no longer will settle for yesterdays products services or levels of quality Things are challenging out there and businesses can no longer simply hunker down and weather the storm Many predict that todays storm is tomorrows business environment an environment in which we must be able to thrive or die Adding to the assault many business leaders are shocked at how much change is likely to be required in such a short period of time No longer is it a question of if or when huge waves of change will hit its a matter of how well organizations are positioned to effectively navigate and even flourish in the changes Waves of change are already hitting the beach and their strength is almost certain to build Its too late for a bunker mentality Out of the bunkers and into what Companies cannot stay in their bunkers forever Sooner or later they must come out and face the music That means they must come out and change the way they do business in order to fit into the turbulent world Change is no longer an option but change the way they do business to what Companies coming out have two options options that are as different as night and day Surviving The intuitively obvious way The focus of doing business just to survive is logical and intuitively obvious It has companies adopting and or adapting survival tactics as the core of their new way They limit the changes they make to just get over the survival threshold Process changes are most likely very conservative patches glue ons work arounds tweaks fix and repair rather than replace emergency repairs rather than preventive maintenance etc all pursued in an atmosphere of severe cost cutting and staffing layoffs While risk management may be a goal survival oriented companies try to dodge every risk regardless of the risk rewards taking away almost all of their undeveloped opportunities that might be sources of new life for the company Unfortunately the slogan of this new way of doing business might be out of the frying pan and into the fire Thriving The straight and narrow way The focus of this new way of doing business will be positioning the organization so that it will thrive even in a nasty business environment The first step in moving toward a thriving business will be to set a

vision that is designed to separate the company from the middle of the road pack of competitors This way of doing business will require the company to improve all work processes that could translate into a competitive edge Processes must be advanced beyond best practices to an industry leading position This way of doing business calls for investment in the best available technology that enables the companys core processes in equipment upgrades where possible expansion of employee responsibilities provision of aggressive training on key skills that support core work processes and more All of these actions will require energy and resources as the straight and narrow way calls for an investment and opportunity mindset However the largest investment will need to be in innovation not innovation you pay for but innovation from

Congress,1997 Setting Performance Targets Carolyn Stringer,2012-01-13 Targets are an important part of our work life whether we are setting them or meeting them There is a science to target setting Unfortunately the behavioral impact of target setting on performance is underestimated This can lead to serious consequences such as game playing overcharging customers or demotivating competent managers This book will help you fill the gap in target setting for performance The pivotal issue in target setting is that it is an art as well as a science Perhaps more of an art requiring a balance between the psychologies of the people taking initiatives the science of estimating probabilities and aligning with strategies coupled with the motivational effects of incentives You will also be introduced to some of the important methods in target setting such as forecasting sensitivity analysis and probability analysis all of which include practical examples to show how these techniques can be directly applied In the end you ll learn how interrelated the various parts of organizational activities are and how they impact on each other which is important since target setting must include an understanding of the organizational context e g people competitive environment structure strategy as well as the impact of incentive compensation and information flows The Economics of Climate Change in China Fan Gang,Nicholas Stern,Ottmar Edenhofer,Xu Shanda,Klas Eklund,Frank Ackerman,Lailai Li,Karl Hallding,2013-09-13 China faces many modernization challenges but perhaps none is more pressing than that posed by climate change China must find a new economic growth model that is simultaneously environmentally sustainable can free it from its dependency on fossil fuels and lift living standards for the majority of its population But what does such a model look like And how can China best make the transition from its present macro economic structure to a low carbon future This

ground breaking economic study led by the Stockholm Environment Institute and the Chinese Economists 50 Forum brings together leading international thinkers in economics climate change and development to tackle some of the most challenging issues relating to China s low carbon development This study maps out a deep carbon reduction scenario and analyzes economic policies that shift carbon use and shows how China can take strong and decisive action to make deep reductions in carbon emission over the next forty years while maintaining high economic growth and minimizing adverse effects of a low carbon transition Moreover these reductions can be achieved within the finite global carbon budget for greenhouse gas emissions as determined by the hard constraints of climate science The authors make the compelling case that a transition to a low carbon economy is an essential part of China s development and modernization Such a transformation would also present opportunities for China to improve its energy security and move its economy higher up the international value chain They argue that even in these difficult economic times climate change action may present more opportunities than costs Such a transformation for China and the rest of the world will not be easy But it is possible necessary and worthwhile to pursue
