**Group Work** Nano McCaughan,2021-11-07 Group work is central to social work whether it be work with individuals and families residential care community work management or social work education Despite however the upsurge of interest in this aspect of social work method at the time Group Work Learning and Practice originally published in 1978 represented the first attempt at providing an up to date and carefully integrated source book for students in the form of a series of mainly original and British papers on social group work its knowledge base the possible varieties of practice settings and objectives and its implications for social work education and training models For

new directions in social work education suggested that the small group was to become the core system around which much future social work teaching would be based. The main concern of this new National Institute for Social Work reader the development and demonstration of intervention skills in practice would be particularly relevant. The book draws attention to the opportunities for work with groups in the community in residential institutions and with families where the emphasis was rapidly shifting towards the need for greater understanding and use of the small group dimension. Group Work Learning and Practice would have been widely welcomed both by specialists in group work at the time and all those more generally interested in social work methods as teachers, students, practitioners, supervisors and as local authority training officers. It would also be of interest to a wider readership of teachers, youth workers and those concerned with the group dynamics and counselling fields.

**Multi-objective Group Decision Making** Jie Lu, 2007. This book proposes a set of models to describe fuzzy multi objective decision making MODM, fuzzy multi criteria decision making MCDM, fuzzy group decision making GDM and fuzzy multi objective group decision making problems respectively. It also gives a set of related methods including algorithms to solve these problems. One distinguishing feature of this book is that it provides two decision support systems software for readers to apply these proposed methods. A set of real world applications and some new directions in this area are then described to further instruct readers how to use these methods and software in their practice.

**Making Strategy** Colin Eden, Fran Ackermann, 2013-04-04. This book approaches strategy making in a way that is designed to assist most organizations develop strategy appropriate to their size, purpose and resources. It provides a much needed guide to the strategy making process by elaborating the key concepts and theories of strategic management by illustrating through case vignettes the issues inherent in the process of strategy making and by providing extensive and detailed practical guidelines on the methods, techniques and tools employed in the case vignettes. Key themes explored are the crucial significance of political feasibility, the role of participation, emphasis on stakeholder management, thinking about alternative futures within the overall process of strategy making.
