Inhuman Thoughts is a philosophical exploration of the possibility of increasing the physiological and psychological capacities of humans to the point that they are no longer biologically psychologically or socially human The movement is from the human through the trans human to the post human The tone is optimistic Seidel argues that such an evolution would be of positive value on the whole Seidel's initial argument supports the need for a comprehensive ethical theory the success of which would parallel that of a large scale scientific revolution such as Newtonian mechanics He elaborates the movement from the improved but still human to the post human and philosophically examines speculated examples of post human forms of life including indefinitely extended life span parallel consciousness altered perception a sociality and a sexuality *Inhuman Thoughts* is directed at those interested in philosophical questions on human nature and the best life given the possibilities of that nature Seidel's overall argument is that the most satisfactory answer to the latter question involves a transcendence of the present confines of human nature
