A HISTORY OF THE ENGLISH LANGUAGE

CLASSICAL  
STUDIES  
AND  
MEDIEVAL  
LITERATURE

The English language, as we know it, is the result of a long and complex process of development. It is a language that has been shaped by a variety of factors, including the influence of other languages, the needs of a changing society, and the creative genius of individual writers. The history of the English language is a story of constant change and adaptation, a story that reflects the history of the people who speak it. This book, *The Making of Chaucer's English*, is a comprehensive history of the English language from its earliest beginnings to the time of Chaucer. It explores the various influences that have shaped the language, from the Latin and French of the Middle Ages to the Old English of the Anglo-Saxons. It also examines the role of individual writers, such as Chaucer, in the development of the language. The book is written in a clear and accessible style, and it is illustrated with numerous examples of Old English and Middle English text. It is a valuable resource for anyone interested in the history of the English language.

**The Making of Chaucer's English** Christopher Cannon, 1998 The Making of Chaucer's English undertakes a substantial reappraisal of the place Chaucer's English occupies in the history of the English language and the language of English literature It attacks the widespread presumption that Chaucer invented literary English and argues instead that Chaucer's English is generally traditional It shows that Chaucer's linguistic innovation was as much performance as fact but it also traces the linguistic strategies that made and make the performance of originality so believable It also includes a valuable history of every word Chaucer uses The book also interrogates the theory and methodology of historicising languages so even as it explores how Chaucer's words matter it also questions why these particular words have acquired such importance for poets and scholars alike for 600 years

Sanok, 2025-03-18 Explores the intersections between two fundamental approaches to medieval literature shedding new light on texts ranging from The Canterbury Tales to Le Morte Darthur This volume identifies new methods and questions for language based approaches to medieval English literature and literature based approaches to Middle English by identifying philology as a cross disciplinary practice shared by literary scholarship and linguistics How can late medieval cultural perception and social participation be illuminated by literary language What can language forms tell us about the experience of England's multilingual landscape Contributors trace the relay between imaginative literature and an expanding Middle English lexicon the literary affordances of phonological and morphological features of Middle English and the way that medieval literature engaged with its multilingual sources Essays also consider how social authority is negotiated in language with a particular focus on highly charged words such as corruption instability and treason and highly charged phenomena such as language contact allusion and genre experiments Together they show that literary and linguistic approaches may inform each other to open new avenues of research on a wide variety of texts including Chaucer's The Canterbury Tales and Troilus and Criseyde Malory's Le Morte Darthur Gower's Confessio Amantis Lydgate's Reson and sensuallyte and Hoccleve's Regement of Princes The volume thus pays tribute to the influence on both fields of distinguished medievalist Karla Taylor
