Making Of Marx's Capital:

The Making of Marx's Capital, Volume 1 Roman Rosdolsky, 1989 Roman Rosdolsky investigates the relationship between various versions of Capital and explains the reasons for Marx's successive reworking The Making of Marx's Capital, Volume 2 Roman Rosdolsky, 1977 Rosdolsky's Making of Marx's Capital is a major work of interpretation and criticism written over fifteen years by one of the foremost representatives of the European Marxist tradition Rosdolsky investigates the relationship between various versions of Capital and explains the reasons for Marx's successive reworkings he provides a textual exegesis of Marx's Grundrisse now widely available and reveals its methodological riches He presents a critique of later work in the Marxist tradition on the basis of Marx's fundamental distinction between capital in general and capital in concrete reality The Making of Marx's Capital was first published in 1968 as Zur Entstehungsgeschichte des Marx'schen Kapital **The Making of Marx's Capital** Roman Rosdolsky, 1971 **The Making of Marx's 'Capital'** Roman Rosdolsky, 1989 The Logic of Marx's Capital Tony Smith, 1990-01-01 Beginning with value and commodity at the start of Volume I in Marx's major work and progressing step by step to the end of Volume III Smith establishes in detail that Capital is a systematic theory of socio-economic categories ordered according to dialectical logic At each stage in his analysis of the theory Smith makes Marx's arguments more accessible He also considers in depth the objections to Marx's employment of dialectical logic that have been formulated by Hegelians especially those presented in Klaus Hartmann's Die Marxsche Theorie Smith presents a persuasive case against this whole range of Marx criticisms many of which have also been proposed from non-Hegelian standpoints The Making of Marx's 'Capital', Roman Rosdolsky, 1977 C.L.R. James's Notes on Dialectics John H. McClendon, 2005-01-01 John H. McClendon III's CLR James's Notes on Dialectics Left Hegelianism or Marxism Leninism is the first ever book devoted exclusively to James's magnum opus Notes on Dialectics Hegel Marx Lenin The seed for this study was planted over thirty years ago when James handed the author his personal copy of Notes James's contribution to dialectical philosophy and his vast intellectual and scholarly output is rivalled only by the seemingly bottomless depths of McClendon's own analysis and erudition McClendon provides a thoroughgoing critique of James's exploration into the dialectic of Hegel Marx and Lenin while challenging all the seminal texts on James's Notes A book of this magnitude is rare This is ever more the truth when it is focused on a giant like James who stands at the nexus of so many disciplines philosophy history sociology Caribbean studies cultural studies African and African American studies CLR James's Notes on Dialectics Left Hegelianism or Marxism Leninism is a must read for anyone concerned with how revolutionary theory is a guide to contemporary struggles **Understanding Marx's Capital: A reader's guide** Adam Booth, Rob Sewell, 2019-07-11 Marx's Capital was a book that revolutionised political economy and for the first time opened our eyes to the real workings of capitalism It was however met with a wall of silence from the mainstream economists and the establishment Despite this Capital became regarded in the workers movement as the Bible of the working class The aim of

this book written by authors from the International Marxist Tendency is to help guide readers through the pages of volume one of Capital to bring out the main themes and ideas contained within it and to discuss the relevance of this great Marxist classic in terms of understanding the crisis ridden world around us today and most importantly how we can radically transform it

An Introduction to Marx's 'Capital' Ranganayakamma, Karl Marx's Capital is a work that discusses scientifically not only economic and political issues but also the entire process of development of human society Capital consists of 4 volumes The title of the first volume is Process of Production of Capital This contains 8 parts and a total of 21 chapters The title of the second volume is Process of Circulation of Capital This contains 3 parts The total number of chapters is 21 The title of the third volume is Process of capitalist production as a whole This contains 7 parts The total number of chapters is 52 The fourth volume is in the form of three separate volumes each one of which is called a part The common title of all the three parts is Theories of Surplus Value All the three parts contain a total of 24 chapters Each one of these 3 parts has an Addendum All these as a whole constitute Capital This book is an introduction to Marx's Capital

Exploring Marx's Capital Jacques Bidet, 2007 Offers a fresh interpretation of Marx's great work This book shows how the novelty and lasting interest of Marx's theory arises from the fact that as against the project of a pure economics it is formulated in concepts that have simultaneously an economic and a political aspect neither of these being separable from the other

Essays on Marx's Capital Geert Reuten, 2024-05-13 In this book Geert Reuten presents 21 of his previously published essays on the three volumes Marx's Capital dating from 1991-2019 The essays largely take the form of a summary of Marx's text a Volume or its Parts or Chapters followed by an appreciation and when required a reconstruction The book thus offers an overview of each of the three volumes of Capital including their interconnection as well as a focus on specific Parts of Capital Throughout the general overviews and more focused analyses Reuten emphasises Marx's systematic dialectical method and his monetary value form analysis

A Guide to Marx's 'Capital' Vols I-III Kenneth Smith, 2012-11-15 This book provides a comprehensive guide to all three volumes of Karl Marx's Capital with advice on further reading and points for further discussion Recognizing the contemporary relevance of Capital in the midst of the current financial crisis Kenneth Smith has produced an essential guide to Marx's ideas particularly on the subject of the circulation of money capital This guide uniquely presents the three volumes of Capital in a different order of reading to that in which they were published placing them instead in the order that Marx himself sometimes recommended as a more user friendly way of reading Dr Smith also argues that for most of the twentieth century the full development of the capitalist mode of production CMP has been undermined by the existence of a non capitalist third world which has caused the CMP to take on the form of what Marx called a highly developed mercantile system rather than one characterized by an uninterrupted circuit of industrial capital of the kind he expected would develop While the guide can be read as a book in its own right it also contains detailed references to Volumes I-III so that students seminars and discussion groups can easily make connections between Smith's

explanations and the relevant parts of Capital **A Guide to Marx's 'Capital' Vols I-III**, 2012-11-15 **Reclaiming Marx's Capital** Andrew Kliman, 2007-01-01 This book reclaims Marx's Capital from the myth of inconsistency. An accessible account written for non-specialist readers it shows that the inconsistencies are actually caused by misinterpretation. The recent temporal single system interpretation eliminates all of the alleged inconsistencies **A Guide to Marx's 'Capital'** Anthony Brewer, 1984-03 The Guide aims to contribute to a better understanding of Marx's masterpiece Capital [How to Read Marx's Capital](#) Michael Heinrich, 2021-08-23 An accessible companion to Karl Marx's essential Capital. With the recent revival of Karl Marx's theory a general interest in reading Capital has also increased. But Capital, Marx's foundational nineteenth-century work on political economy, is by no means considered an easily understood text. Central concepts such as abstract labor, the value form, or the fetishism of commodities can seem opaque to us as first-time readers, and the prospect of comprehending Marx's thought can be truly daunting. Until that is, we pick up Michael Heinrich's *How to Read Marx's Capital*. Paragraph by paragraph, Heinrich provides extensive commentary and lucid explanations of questions and quandaries that arise when encountering Marx's original text. Suddenly, such seemingly gnarly chapters as *The Labor Process* and *The Valorization Process* and *Money or the Circulation of Capital* become refreshingly clear, as Heinrich explains just what we need to keep in mind when reading such a complex text. Deploying multiple appendices referring to other pertinent writings by Marx, Heinrich reveals what is relevant about Capital and why we need to engage with it today. *How to Read Marx's Capital* provides an illuminating and indispensable guide to sorting through the cultural detritus of a world whose political and economic systems are simultaneously imploding and exploding *A Companion To Marx's Capital* David Harvey, 2018-11-06 The radical geographer guides us through the classic text of political economy. In recent years we have witnessed a surge of interest in Marx's work in an effort to understand the origins of our current political and economic crisis. For nearly forty years David Harvey has written and lectured on Capital, becoming one of the world's foremost Marx scholars. Based on his recent lectures, this current volume finally bringing together his guides to volumes I, II, and much of III, presents this depth of learning to a broader audience, guiding first-time readers through a fascinating and deeply rewarding text. *A Companion to Marx's Capital* offers fresh, original, and sometimes critical interpretations of a book that changed the course of history, and as Harvey intimates, may do so again **A Contemporary History of Marx's Capital** Paolo Favilli, 2025-09-03 Paolo Favilli provides both students and scholars with an original reading of themes and issues found in Karl Marx's *Das Kapital* and its connections with present-day challenges. By way of continuous cross-referencing between present and past, Favilli demonstrates claims that the scientific status of *Das Kapital*, advanced by countless texts since its original publication, are themselves deeply imbued by the spirit of the times. If in 1963 Jean-Paul Sartre could write that Marxism was the unsurpassable philosophical horizon of our times, what could make an undergraduate student today consider such a claim plausible? Informed by the latest research on Marxist theory and decades teaching the Philosophy of History, Favilli employs a

didactic approach stimulating student engagement and learning opportunities in the classroom This approach allows for a better understanding of relationship between the present and the multiple temporalities that characterise and periodise the contemporary era What follows is a critique of the contemporary academy for its hangover of post 1989 *nuovismo* cult of novelty and inability to make the proper distinctions between Marxism as party state the works of Karl Marx and Marxism as an object of history This led to the spectacle where after 1989 those who had spent most of their careers as Marxist hued scholars not only abandoned this identity but also spurned any recognition that Marx and Marxism were worthwhile objects of inquiry This book was first published in Italian as *A proposito de Il capitale Il lungo presente e I miei studenti Corso di storia contemporanea* Milan FrancoAngeli 2021 This English translation includes a new foreword by the author

Accounting for History in Marx's Capital Robert Bryer, 2019-06-25 Accounting for History uses the accounting interpretation of Marx's theories of history and value to explain and defend his prediction of the inevitability of socialism as the end of history In addition to the technological and institutional development of advanced capitalism Bryer argues that the key necessary conditions are that workers see through capitalist ideology understanding that Marx's theory of value explains why the phenomenal forms appearing in capitalist accounts are distortions of the underlying social reality and that demystified accounting is integral to his concept of socialism on Day One To get to Day One the book concludes Marx left Marxists the tasks of critical accounting [Karl Marx's 'Capital': A Guide to Volumes III](#) Kenneth Smith, 2021-03-31 This guide uniquely presents the three volumes of Capital in a different order of reading to that in which they were published placing them instead in the order that Marx himself sometimes recommended as a more user friendly way of reading Dr Smith also argues that for most of the twentieth century the full development of the capitalist mode of production CMP has been undermined by the existence of a non capitalist third world which has caused the CMP to take on the form of what Marx called a highly developed mercantile system rather than one characterized by an uninterrupted circuit of industrial capital of the kind he expected would develop
