Rapture Practice Aaron Hartzler, 2013-04-09 Sometimes salvation is found in the strangest places a true story Aaron Hartzler grew up in a home where he was taught that at any moment the Rapture could happen That Jesus might come down in the twinkling of an eye and scoop Aaron and his family up to heaven As a kid Aaron was thrilled by the idea that every moment of every day might be his last one on planet Earth But as Aaron turns sixteen he finds himself more attached to his earthly life and curious about all the things his family forsakes for the Lord He begins to realize he doesn't want the Rapture to happen just yet not before he sees his first movie stars in the school play or has his first kiss Eventually Aaron makes the plunge from conflicted do-gooder to full-fledged teen rebel Whether he's sneaking out making out or playing hymns with a hangover Aaron learns a few lessons that can't be found in the Bible He discovers that the best friends aren't always the ones your mom and dad approve of and the tricky part about believing is that no one can do it for you In this funny and heartfelt coming-of-age memoir debut author Aaron Hartzler recalls his teenage journey to find the person he is without losing the family that loves him It's a story about losing your faith and finding your place and your own truth which is always stranger than fiction **Legislative, Executive, and Judicial Appropriation Bill, 1917** United States. Appropriations, Committee on, 1916 *Identity Economics* George A. Akerlof, Rachel E. Kranton, 2010-01-21 How identity influences the economic choices we make Identity Economics provides an important and compelling new way to understand human behavior revealing how our identities and not just economic incentives influence our decisions In 1995 economist Rachel Kranton wrote future Nobel Prize winner George Akerlof a letter insisting that his most recent paper was wrong Identity she argued was the missing element that would help to explain why people facing the same economic circumstances would make different choices This was the beginning of a fourteen-year collaboration and of Identity Economics The authors explain how our conception of who we are and who we want to be may shape our economic lives more than any other factor affecting how hard we work and how we learn spend and save Identity economics is a new way to understand people's decisions at work at school and at home With it we can better appreciate why incentives like stock options work or don't why some schools succeed and others don't why some cities and towns don't invest in their futures and much much more Identity Economics bridges a critical gap in the social sciences It brings identity and norms to economics People's notions of what is proper and what is forbidden and for whom are fundamental to how hard they work and how they learn spend and save Thus people's identity their conception of who they are and of who they choose to be may be the most important factor affecting their economic lives And the limits placed by society on people's identity can also be crucial determinants of their economic well-being *Statutes at Large ...: (43 v.) ...
