Making Disability Modern Design Histories brings together leading scholars from a range of disciplinary and national perspectives to examine how designed objects and spaces contribute to the meanings of ability and disability from the late 18th century to the present day and in homes offices and schools to realms of national and international politics The contributors reveal the social role of objects particularly those designed for use by people with disabilities such as walking sticks wheelchairs and prosthetic limbs and consider the active role that makers users and designers take to reshape the material environment into a usable world But it also aims to make clear that definitions of disability and ability are often shaped by design *Disability and Social Theory* D. Goodley, B. Hughes, L. Davis, 2012-06-01 This comprehensive interdisciplinary collection examines disability from a theoretical perspective challenging views of disability that dominate mainstream thinking Throughout social theories of disability intersect with ideas associated with sex gender race ethnicity class and nation Making Disability Modern Bess Williamson, Elizabeth Guffey, 2020-07-23 Making Disability Modern Design Histories brings together leading scholars from a range of disciplinary and national perspectives to examine how designed objects and spaces contribute to the meanings of ability and disability from the late 18th century to the present day and in homes offices and schools to realms of national and international politics The contributors reveal the social role of objects particularly those designed for use by people with disabilities such as walking sticks wheelchairs and prosthetic limbs and consider the active role that makers users and designers take to reshape the material environment into a usable world But it also aims to make clear that definitions of disability and ability are often shaped by design *Disability, Space, Architecture: A Reader* Jos Boys, 2017-02-17 Disability Space Architecture A Reader takes a groundbreaking approach to exploring the interconnections between disability architecture and cities The contributions come from architecture geography anthropology health studies English language and literature rhetoric and composition art history disability studies and disability arts and cover personal theoretical and innovative ideas and work Richer approaches to disability beyond regulation and design guidance remain fragmented and difficult to find for architectural and built environment students educators and professionals By bringing together in one place some seminal texts and projects as well as newly commissioned writings readers can engage with disability in unexpected and exciting ways that can vibrantly inform their understandings of architecture and urban design Most crucially Disability Space Architecture A Reader opens up not just disability but also ability disability as a means of refusing the normalisation of only particular kinds of bodies in the design of built space It reveals how our everyday social attitudes and practices about people objects and spaces can be better understood through the lens of disability and it suggests how thinking differently about disability can enable innovative and new kinds of critical and creative architectural and urban design education and practice *Federal Register*, 1981-05-26
