*Regulatory Convergence in EU Securities Regulation* Iris H.-Y. Chiu, 2008-01-01 Offers a new approach to the legal issues raised by the drive for convergence in securities regulation The author offers an informed and insightful examination of the implications for regulatory and policy design if regulatory convergence were to be rigorously implemented **The Oxford Handbook of Financial Regulation** Niamh Moloney, Eilís Ferran, Jennifer Payne, 2015-08-27 The financial system and its regulation have undergone exponential growth and dramatic reform over the last thirty years This period has witnessed major developments in the nature and intensity of financial markets as well as repeated cycles of regulatory reform and development often linked to crisis conditions The recent financial crisis has led to unparalleled interest in financial regulation from policymakers economists legal practitioners and the academic community and has prompted large scale regulatory reform The Oxford Handbook of Financial Regulation is the first comprehensive authoritative and state of the art account of the nature of financial regulation Written by an international team of leading scholars in the field it takes a contextual and comparative approach to examine scholarly policy and regulatory developments in the past three decades The first three parts of the Handbook address the underpinning horizontal themes which arise in financial regulation financial systems and regulation the organization of financial system regulation including regional examples from the EU and the US and the delivery of outcomes and regulatory techniques The final three Parts address the perennial objectives of financial regulation widely regarded as the anchors of financial regulation internationally financial stability market efficiency integrity and transparency and consumer protection The Oxford Handbook of Financial Regulation is an invaluable resource for scholars and students of financial regulation economists policy makers and regulators Making Disclosure Mary Geraldine Condon, 1998 Historically two issues have dominated the study of regulatory agencies first how their goals are defined and achieved and second how their behaviour can be explained The influence of public and private interests on agencies has always been taken as central to understanding the outcomes of regulation Mary Condon argues that the study of interests is not a straightforward task Interests can be incoherent and they can shift and change over time We often leap to the conclusion that regulations are made specifically to benefit certain constituents when in fact other forces are also at play Our notion of a distinct public private divide among interests may also be flawed Condon proposes a new approach to the problem She urges us to examine the ideas behind regulation their source and how they have been interpreted by the regulators the regulated and other interests She argues that interests and ideas are mutually constructed for example ideas can be reshaped by the interests that they originally spawned In this book Condon applies this interpretative approach to the case of Ontario securities regulation She considers legislation policy making and regulatory undertakings from 1945 through the 1970s Making Disclosure provides an excellent example of how ideas and interests influence policy It is an important source text for courses on law and policy making and it contains valuable insights for observers of regulation It breaks new ground

for professionals in the securities industry and readers who are interested in regulatory decision making and the process of legislative reform

*European Developments in Corporate Criminal Liability* James Gobert, Ana-Maria Pascal, 2011-06-10 When corporations carry on their business in a grossly negligent manner or take a cavalier approach to risk management the consequences can be catastrophic The harm may be financial as occurred when such well regarded companies as Enron Lehman Brothers Worldcom and Barings collapsed or it may be environmental as illustrated most recently by the Gulf oil spill Sometimes deaths and serious injuries on a mass scale occur as in the Bhopal gas disaster the Chernobyl nuclear explosion the Paris crash of the Concorde the capsizing of the Herald of Free Enterprise and rail crashes at Southall Paddington and Hatfield in England What role can the law play in preventing such debacles and in punishing the corporate offenders This collection of thematic papers and European country reports addresses these questions at both a theoretical and empirical level The thematic papers analyse corporate criminal liability from a range of academic disciplines including law sociology criminology economics philosophy and environmental studies whilst the country reports look at the laws of corporate crime

**Policing the Markets** James Williams, 2012-01-17 Set against the backdrop of the recurring waves of financial scandal and crisis to hit Canada the US the UK and Europe over the last decade this book examines the struggles of securities enforcement agencies to police the financial markets While allegations of regulatory failure in this realm are commonplace and are well documented in policy and legal scholarship James Williams seeks to move beyond these conventional accounts arguing that they are based on a limited view of the regulatory process and overlook the actual practices and dilemmas of enforcement work Informed by interviews with police regulators lawyers accountants and investor advocates along with a wealth of documentary materials the book is rooted in a uniquely interdisciplinary social science perspective Peering inside the black box of enforcement it examines the organizational professional geographical technological and legal influences that shape securities enforcement as a distinctly knowledge based enterprise The result of these influences Williams argues is the production of a very particular vision of financial disorder which captures certain forms of misconduct while overlooking others a reflection not of incompetence or capture but of the unique demands and constraints of the regulatory craft Providing a very different and much needed account of the challenges faced by regulators and enforcement agencies this book will be of enormous interest to current research on enforcement regulation and governance both within and beyond the financial realm

**Moose Pastures and Mergers** Chris Armstrong, 2001-12-15 Long before the spectacular collapse of Bre X in 1997 the Canadian capital markets had their share of swindlers and crooks In the boom times after Second World War hard sell speculative mining ventures pushing what often amounted to a few acres of moose pasture riddled over the counter markets and the TSE It was in this context that the Ontario Securities Commission developed into Canada's leading securities regulator Following the war the OSC concerned itself primarily with fraudsters and attempts to reign in Toronto's boiler rooms but by the mid sixties increasingly sophisticated markets and a series of scandals culminating in the Windfall affair resulted in a rewriting of the Securities Act and a widening of the OSC's investor protection mandate The seventies tested the Commission's new powers as increased corporate merger activity brought the phrase insider trading into the popular lexicon Surprisingly considering that capital markets have such a profound impact on Canada's well being this is the first thorough study of the their post war evolution and regulation Moose Pastures and Mergers takes off where the author's acclaimed previous work Blue Skies and Boiler Rooms Buying and Selling Securities in Canada 1870 1940 left off With an ear for a good story seedy personalities bunglers and guileless victims abound and a scholar's rigour Armstrong has met the protean beast of share markets head on and revealed its shape for the timid or the merely baffled Essential reading for business journalists securities lawyers academics and interested investors Winner of the J J Talman Award presented by the Ontario Historical Society

**Promoting Information in the Marketplace for Financial Services** Paul Latimer, Philipp Maume, 2014-11-14 This book provides a unique comparative and global analysis of the regulation of disclosure in financial securities markets It is written by two authors who represent both the new world Australia and the old world Germany The authors present their research in the global business context with legal and regulatory perspectives including some references from Africa Asia the Middle East and South America After every boom and bust legislators pass new disclosure legislation often in a heated environment fuelled by politics and the media Little regard is paid to existing regulation or the lessons learned from earlier regulation The result is the continuing enactment of redundant and overlapping disclosure laws Since financial markets are often described as markets for information the failure to ensure disclosure is at the heart of financial services regulation This book argues that the solution to the failure of disclosure is a brief easily understood principles based plain English safety net amendment to statute law such as you must keep the financial market fully informed a measure that would support effective mandatory continuous disclosure of information to financial markets This book examines the reasons for disclosure regulation and how the efficient operation of financial markets is dependent on disclosure It examines the adequacy of

common law and civil law concerning broker client disclosure and concludes that industry licensing in itself fails to keep the market informed While recognizing the failures of securities commissions to achieve good disclosure in financial markets it confirms the effectiveness of coregulation of disclosure by a commission with the support of the financial markets such as the stock exchange Coregulation builds on financial market self regulation and is best described in the words of one time SEC Chairman William O Douglas who in the 1930s described it as a shotgun behind the door
