Minerals Management Service, 1987 *Regional Geography of the United States and Canada* Tom Lee McKnight, 1997 An appreciation of the regional geography of North America this revised text emphasizes the description and interpretation of North American landscapes including their sequential development It covers issues ranging from ecosystems and urban morphology to agriculture and inland waterways **Exploring and Mapping Alaska** Alexey Postnikov, Marvin Falk, 2015-06-15 Russia first encountered Alaska in 1741 as part of the most ambitious and expensive expedition of the entire eighteenth century For centuries since cartographers have struggled to define and develop the enormous region comprising northeastern Asia the North Pacific and Alaska The forces of nature and the follies of human error conspired to make the area incredibly difficult to map Exploring and Mapping Alaska focuses on this foundational period in Arctic cartography Russia spurred a golden era of cartographic exploration while shrouding their efforts in a veil of secrecy They drew both on old systems developed by early fur traders and new methodologies created in Europe With Great Britain France and Spain following close behind their expeditions led to an astounding increase in the world's knowledge of North America Through engrossing descriptions of the explorations and expert navigators aided by informative illustrations readers can clearly trace the evolution of the maps of the era watching as a once mysterious region came into sharper focus The result of years of cross continental research Exploring and Mapping Alaska is a fascinating study of the trials and triumphs of one of the last great eras of historic mapmaking Revision of the Jumping Mice of the Genus *Zapus* Edward Alexander Preble, 1899 **North American Fauna**, 1897 Revision of the Shrews of the American Genera *Blarina* and *Notiosorex* Clinton Hart Merriam, 1895 Furs and Frontiers In the Far North John R. Bockstoce, 2009-09-15 This comprehensive history of the native and maritime fur trade in Alaska during the eighteenth and nineteenth centuries is without precedent The Bering Strait formed the nexus of the circumpolar fur trade in which Russians British Americans and members of fifty native nations competed and cooperated The desire to dominate the fur trade fed the European expansion into the most remote regions of Asia and America and was an agent of massive change in these regions Award winning author John R Bockstoce fills a major gap in the historiography of the area in covering the scientific commercial and foreign relations implications of the northern fur trade In addition the book provides rare insight into the

relationship between the Western powers and the Native Americans who provided them with fur ivory and whalebone in exchange for manufactured goods tobacco tea alcohol and hundreds of other things But this is also the story of the enterprising individuals who energized the Alaskan fur trade and in doing so forever altered the region s history **Bulletin of the American Geographical Society** American Geographical Society of New York,1914 **Recalibration of a Ground-water Flow Model of the Mississippi River Valley Alluvial Aquifer of Northeastern Arkansas, 1918-1998, with Simulations of Water Levels Caused by Projected Ground-water Withdrawals Through 2049** T.
