Midlife in Perspective Herant A. Katchadourian, 1986      **The Imperfect Art** Ted Gioia, 1990-07-19 Taking a wide ranging approach rare in jazz criticism Ted Gioia's brilliant volume draws upon fields as disparate as literary criticism art history sociology and aesthetic philosophy in order to place jazz within the turbulent cultural environment of the twentieth century He argues that because improvisation the essence of jazz must often fail under the pressure of on the spot creativity we should view jazz as an imperfect art and base our judgments of it on an aesthetics of imperfection Incorporating the thought of such seminal thinkers as Walter Benjamin Jos Ortega y Gasset and Roland Barthes *The Imperfect Art* offers vivid portraits of the giants of jazz and startling insights into this vital musical form and the interaction of society and art      *The Stanford Magazine*, 1987      **Stanford**, 1991      *The Sleepwatchers* William C. **Around California in 1891** Terence Emmons, 1991 Part 1 by Nicholas Russel is an account of his travels in California in 1891 which has been translated into English from an unpublished manuscript in Russian by Terrence Emmons Part 2 a biography of Russel written by Emmons      Notable Or Notorious? Gordon Wright, 1989      Fifty Herant A. Katchadourian, 1987 Discusses the perception of time looks at the effects of aging and describes sexuality personality family life marriage divorce and work at age fifty      *Women Growing Older* Barbara F. Turner, 1994 Until now little existed in the way of a theory of gender and aging This volume fills the void Rich with primary data *Women Growing Older* presents new research on older women and relates it to the psychology of adult development and aging After an introductory chapter that brings together conceptions of gender and aging well known contributors examine how women decide to balance work and career marriage and motherhood and the results of such life decisions The authors then take an adult life span approach to Americans gender and racial stereotypes of young middle aged and elderly women A penetrating historical analysis of cultural images and the nature of cognition mind and creativity follows The contributors also present a life span approach to attachment theory and women's social relations They also take a look at the relevance of psychodynamic theories for understanding gender among older women Students researchers and professionals in the fields of aging gender psychology

sociology family studies social work and nursing will appreciate the excellent material and insights contained in *Women Growing Older*. *Women Growing Older* is a powerful and a highly technical book. The authors describe how the focus on sex differences rather than on similarities serves to perpetuate male dominance. Their research findings demonstrate that resulting sex differences are invariably used against women. Sex roles are internalized early in life by the process of social learning and socialization; these are then enacted into adulthood in different social settings. Their research looks at the content of gender stereotypes and they then explore the process that people use in deciding what other people are like. *Journal of Mental Health and Aging*. This edited book has several major strengths. A portion of the book addresses the ways in which women balance work and family and the consequences of these decisions or choices in late life. Such research is timely and especially challenging given the differential experience of successive cohorts that accompanies historical shifts in assessments of family life. Given its importance, this topic could fill an entire text itself. This volume provides an important contribution to the literature. It is a valuable resource for the college or master's level student of psychology, women's studies and gerontology. *Journal of Women and Aging*. The chapters combine reviews and presentation of fresh empirical data. A valuable compilation. Upper division graduate through faculty choice. This is the first book of which I am aware to provide a theoretical integration of feminist perspectives on the psychology of aging in terms of women's experiences. I believe the editors have done a superb job of selecting chapter authors and the authors in turn have written interesting, enlightening and provocative analyses of gender issues in adult development and aging. I am impressed with the wide range of theoretical frameworks that the authors incorporated in their analyses; researchers and students alike should find plenty of ideas for useful approaches to their own projects. I am also impressed with the range of methods and samples represented in the chapters. By their approach to selecting the contents of the book, the editors employed feminist principles of acknowledging a heterogeneity of experience across groups of women, whether categorized by cohort, racial/ethnic background or stage of the life course and b) the importance of using diverse methods to gather data. Finally, I liked the way the authors locate their topics and theoretical approaches in the historical context of the development of knowledge so that readers gain understanding of some of the reasons that current research and theory development are at their current statuses. Thus, both the method and the content of the book reflect the principles the editors and authors advocate. Rosemary Blieszner, Virginia Polytechnic Institute and State University. This is an interesting and varied book. It is useful in an area which has traditionally perceived gender as almost a peripheral factor in the psychological experience of older women. Definitely worth a look. *Health Psychology Update*. Turner's introduction and Labouvie-Vief's chapter *Women's Creativity and Images of Gender* take a different form. The former is an excellent summary of the book's purpose, a brief description of differing theoretical perspectives represented in the book as well as its significant omissions and concise summaries of the subsequent chapters. The book is useful for those who want a quick overview of specific psychological theories and their related literature. The

authors clearly describe the approach they are using discuss relevant constructs and refer to related literature A good supplementary reader in gender and or aging related courses Contemporary Gerontology     *Teach Your Children Well*  
Robert C. Calfee, Cynthia L. Patrick, 1995     *Forthcoming Books* Rose Arny, 1996-06
