Philosophy of Drama Józef Tischner, 2024-09-01 The Philosophy of Drama provides an in depth and erudite exploration of human existence as a dramatic existence interpreted in terms of encounter dialogue reciprocity erring temptation condemnation and justification In this magnum opus Catholic philosopher J zef Tischner offers a philosophical interpretation of the human experience and articulates a metaphysics of good and evil arguing that the drama of existence is revealed most clearly through the painful encounter with evil Long overdue for translation into English The Philosophy of Drama is one of the most important works of Polish philosophy to date and a major contribution to phenomenology and the philosophy of dialogue Tischner writes of a drama that is at once personal and social that is bound both by the stage of the present world and by the flow of time It supposes human freedom while also recognizing the way in which human beings refuse to take responsibility for their freedom It is a drama between divine and human freedom on the one hand and between the choice for good and evil between humans as cursed or blessed on the other The Philosophy of Drama addresses the profound question of why we should be responsible for one another and for the world in which we live and is essential reading for anyone trying to understand what it is to be human European Missions to the International Space Station John O'Sullivan, 2020-05-08

German Idealism Frederick C. BEISER, 2009-06-30 One of the very few accounts in English of German idealism this ambitious work advances and revises our understanding of both the history and the thought of the classical period of German philosophy As he traces the structure and evolution of idealism as a doctrine Frederick Beiser exposes a strong objective or realist strain running from Kant to Hegel and identifies the crucial role of the early romantics H lderlin Schlegel and Novalis as the founders of absolute idealism Traditionally German idealism is understood as a radical form of subjectivism that expands the powers of the self to encompass the entire world But Beiser reveals a different in fact opposite impulse an attempt to limit the powers of the subject Between Kant and Hegel he finds a movement away from cosmic subjectivity and toward greater realism and naturalism with one form of idealism succeeding another as each proved an inadequate basis for explaining the reality of the external world and the place of the self in nature Thus German idealism

emerges here not as a radical development of the Cartesian tradition of philosophy but as the first important break with that tradition
