My Pride And Joy:

Pride And Joy Terri Casey, 2011-08-02 *Pride and Joy The Lives and Passions of Women Without Children* is a collection of interviews with 25 women who have chosen not to have children. In lively stories and vivid voices these diverse narrators talk proudly of their contributions to their communities, causes, and families, and they speak joyfully of intimate relationships with husbands and partners, of family and friends, work, volunteer, and leisure activities, solitude, and connections with children. Their stories dispel the social myth that women must have children to be happy, and they debunk the stereotypes of childless women. For the 20 percent of U.S. women who are currently childless by choice or by chance, *Pride and Joy* offers validation and community. For the millions of women deciding whether to have children, it provides inspiration. For parents, siblings, and friends of women who have chosen or may choose not to have children, it offers insight.

Zanzibar Was a Country Nathaniel Mathews, 2024-04-09 *Zanzibar Was a Country* explores the transregional impact of the Zanzibar Revolution of 1964 through the historical memory of its exiles. Thousands of former citizens of Zanzibar and their offspring live in Oman and are a significant contemporary example of an Arab community that maintains a living connection to Africa in diaspora. These Zanzibaris, as they are often known in Oman, speak Swahili, sustain community originally formed in Africa, and continue to remember Zanzibar's history as an independent country. Drawing on their life histories, their historiography of Zanzibar, and the archival traces of their migrations, Nathaniel Mathews demonstrates how these exiles were important to nation building and economic development in Oman.

Motown in Love Herb Jordan, 2006 Presents the complete lyrics to over one hundred Motown love songs grouped into such categories as lessons of love, the joy of love, and love lost, and including "I'll Be There," "My Girl," and "Please Mr. Postman."

Formed by Him Jessie Campbell, 2013-08-24 Inspired by the Holy Spirit, I could not help but write these poems to the Body of Christ, as He directed. They reveal the very heart of the Father towards His dear children. He addresses the depths, heartaches, and needs of the human heart and medicates it with the very balm of His wisdom and love. We need only look to the Book of Psalms and know that God is a preeminent poet. Those that call Him Father are assured that they hear His voice for we are His sheep. He is still calling and speaking today.

All Kinds of Humor Frank Verano, 2012-10 For a starter let's face it I made it to 94 years and frankly that is an achievement that dwarfs anything else I can say about my long life so far and I ain't through yet If I were to point to the most significant event of my life I would have to say that I was a witness to a critical event in American history and perhaps in world history the devastating attack on our Navy at Pearl Harbor on December 7 1941 The rest of my life was somewhat nondescript in the overall scheme of things in this world I was born just like everyone else in Holland Michigan way back a good 200 years ago I was a musician from the start playing the harmonica at 10 years old Also later the ukulele mandolin Hawaiian guitar orchestral guitar and marimba My first performance was with the harmonica before my 8th grade class Later on as a teenager I played in an orchestra and performed at dances night clubs and church events Currently I duo on the classical guitar with my flute player playing occasional concerts Now that I think of it I was pretty good Being a small 109 pound guy I joined the Navy in 1940 so as to not get drafted WW2 was already raging in Europe I had to enlist for 6 years That put me in WW2 from the beginning to the end and then some Hey I also performed on the guitar in the Navy aboard ship between naval battles Upon discharge in 1946 I joined with my high school buddy to get the first printed circuit patent I am really proud of that because printed circuits are in everything that's electronic And we started it It was particularly smart of me because 40 years later I needed the printed circuit in my pacemaker Such foresight At the same time I entered college at MIT Our patent royalties helped pay for tuition As long as I am being proud I may as well include graduating from that top technical school in the country which is pretty good for a son of an immigrant from Italy From thereon my engineering career included teaching at Cal Poly in San Luis Obispo lecturing at USC and work in computers and programming But of course most of my work was in the Defense industry Now in retirement I am doing things I like to do play music and write Looking back I think that getting an engineering degree was a big mistake I should have been a gigolo Look at what I missed Alas it is too late
