Romantic Science and the Experience of Self Martin Halliwell,2016-03-31 First published in 1999 this engaging interdisciplinary study of romantic science focuses on the work of five influential figures in twentieth century transatlantic intellectual history In this book Martin Halliwell constructs an innovative tradition of romantic science by indicating points of theoretical and historical intersection in the thought of William James American philosopher Otto Rank Austrian psychoanalyst Ludwig Binswanger Swiss psychiatrist Erik Erikson Danish German psychologist and Oliver Sacks British

neurologist Beginning with the ferment of intellectual activity in late eighteenth century German Romanticism Halliwell argues that only with William James theory of pragmatism early in the twentieth century did romantic science become a viable counter tradition to strictly empirical science Stimulated by debates over rival models of consciousness and renewed interest in theories of the self Halliwell reveals that in their challenge to Freud s adoption of ideas from nineteenth century natural science these thinkers have enlarged the possibilities of romantic science for bridging the perceived gulf between the arts and sciences

*The Art-Science Symbiosis* Marcelo Velasco, Ignacio Nieto, 2024-06-20. This book delves into the long standing human aspiration to combine art and science. In six chapters *The Art Science Symbiosis* outlines new approaches to understand current scientific practice in general and art science in particular showcasing how contemporary art can provide a unique perspective on the meaning and potential of collaboration. With more than a hundred full colour images *The Art Science Symbiosis* serves as a resource for researchers interested in the art science integration as well as a general reference for interdisciplinary and transdisciplinary work. In the book twenty two works have been selected based on their inherent merits and for the emergent knowledge that their art science integration produces. These works have sparked novel questions, ideas and curiosity amongst scientists and artists alike which we hope will promote further dialogue not only amongst them but with the general public inspiring a process that may lead to diverse complex and promising results with real world consequences we have as yet to uncover. The key messages of the book are: Contemporary art is a powerful space of dialogue between science and the public. Interdisciplinary work based on symmetrical collaboration promotes groundbreaking results. Artistic inquiry can lead to new understanding of scientific exploration. Art science practice could be started using a simple methodology.
