James Laughlin Kenneth Rexroth, 1991 Frankly H Miller was defended by me only because he spoke against the War and I think that was the main reason for his fame Now I do not believe what with Palmistry Chirography Phrenology and the Great Cryptogram he will survive the retooling period I honestly think he is the most insufferable snob I have ever met but all reformed pandhandlers are like that in a letter from Kenneth Rexroth to James Laughlin **A New Direction for China's**

Defense Industry Evan S. Medeiros, Roger Cliff, Keith Crane, James C. Mulvenon, 2005-12-19 Since the early 1980s a prominent and consistent conclusion drawn from research on China's defense industrial complex has been that China's defense production capabilities are rife with weaknesses and limitations This study argues for an alternative approach From the vantage point of 2005 it is time to shift the focus of current research to the gradual improvements in and the future potential of China's defense industrial complex The study found that China's defense sectors are designing and producing a wide range of increasingly advanced weapons that in the short term are relevant to a possible conflict over Taiwan but also to China's long term military presence in Asia Part of a larger RAND Project AIR FORCE study on Chinese military modernization this study examines the current and future capabilities of China's defense industry The goals of this study are to 1 New Directions in Human Associative Learning Andy J. Hetrick, 2022-10-18 Beginning in 1816 the American Colonization Society worked to send American blacks to resettle in Africa From inception however its foundational ethos has been debated These debates continued long after the effective end of the ACS during WWI through the Civil Rights movement to today when even historians among the Press s own authors respectfully hold opposing views In this volume Beverly Tomek and Matthew Hetrick gather essays from scholars with different opinions and divergent methodologies offering not only new research to address some of the old questions about American colonization and missionary activities but also new questions to spur further debate **New Directions in Atomic Physics** C.T. Whelan, Reiner M. Dreizler, J.H. Macek, H.R.J. Walters, 1999-09-30 The last few years have seen some remarkable advances in the understanding of atomic phenomena It is now possible to isolate atomic systems in traps measure in coincidence the fragments of collision processes routinely produce and study multicharged ions One can look at bulk matter in such a way that the fundamental atomic character is clearly evident and work has begun to tease out the properties of anti matter The papers in this book reflect many aspects of modern Atomic Physics They correspond to the invited talks at a conference dedicated to the study of New Directions in Atomic Physics which took place in Magdalene College Cambridge in July of 1998 The meeting was designed as a way of taking stock of what has been achieved and it was hoped as a means of stimulating new research in new areas along new lines Consequently an effort was made to touch on as many directions as we could in the four days of the meeting We included some talks which overviewed whole subfields as

well as quite a large number of research contributions There is a unity to Physics and we tried to avoid any artificial division between theory and experiment We had roughly the same number of talks from those who are primarily concerned with making measurements and from those who spend their lives trying to develop the theory to describe the experiments

Fuzzy Logic and the Internet Masoud Nikraves,Lofti A. Zadeh,2012-11-02 With the daily addition of million documents and new users there is no doubt that the World Wide Web WWW or Web shortly is still expanding its global information infrastructure Thanks to low cost wireless technology the Web is no more limited to homes or offices but it is simply everywhere The Web is so large and growing so rapidly that the 40 million page WebBase repository of Inktomi corresponds to only about 4% of the estimated size of the publicly indexable Web as of January 2000 and there is every reason to believe these numbers will all swell significantly in the next few years This unrestrainable explosion is not bereft of troubles and drawbacks especially for inexperienced users Probably the most critical problem is the effectiveness of Web search engines though the Web is rich in providing numerous services the primary use of the Internet falls in emails and information retrieval activities Focusing in this latter any user has felt the frustrating experience to see as result of a search query overwhelming numbers of pages that satisfy the query but that are irrelevant to the user
