Active Learning Spaces Paul Baepler, D. Christopher Brooks, J. D. Walker, 2014-03-24 With the paradigm shift to student centered learning the physical teaching space is being examined The configuration of classrooms the technology within them

and the behaviors they encourage are frequently represented as a barrier to enacting student centered teaching methods because traditionally designed rooms typically lack flexibility in seating arrangement are configured to privilege a speaker at the front of the room and lack technology to facilitate student collaboration But many colleges and universities are redesigning the spaces in which students learn collapsing traditional lecture halls and labs to create new hybrid spaces large technology enriched studios with the flexibility to support active and collaborative learning in larger class sizes With this change our classrooms are coming to embody the 21st century pedagogy which many educators accept and research and teaching practice are beginning to help us to understand the educational implications of thoughtfully engineered classrooms in particular that space and how we use it affects what how and how much students learn This is the 137th volume of this Jossey Bass higher education series It offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers

Technology: Taking the Distance out of Learning Margit Misangyi Watts, 2003-07-26 There is a current of frustration among many faculty members based in on feeling pressured to produce distance education Yet others suggest that there is no excuse to not use the new available tools These educators find that using technology intelligently will almost certainly extend both reach and results But those frustrated ones might agree that the reach is extended but aren't so certain about the results Understanding that one of the goals of a liberal education is also to openly debate and defend cultural assumptions perhaps we need to perhaps come to terms with the explosion of technology that promises to change our educational paradigm Faculty must view themselves as learners along with students using the new technologies together in an exploration and analysis of the world and its meaning This volume addresses the profound questions and their implications that stem from the tide of new technologies thrust into our lives The narrative focuses on the educational arena as it has become the emergent venue for conversations about technology Rather than only dealing with instances of success or failure in classrooms or contributing to theories about various applications of software and hardware this book issue addresses technology specifically the new computer technologies as a new cultural symbol These chapters should encourage participation in meaningful conversations about technology in general and how it effects affects education in particular This is the 94th issue of the quarterly journal New Directions for Teaching and Learning

Aspects of Educational Technology B. S. Alloway, G. M. Mills, 1984 **New Directions in Technological Pedagogical Content Knowledge Research** Dr. Myint Swe Khine, 2015-05-01 In the past decades wide ranging research on effective integration of technology in instruction have been conducted by various educators and researchers with the hope that the affordances of technology might be leveraged to improve the teaching and learning process However in order to put the technology in optimum use knowledge about how and in what way technology can enhance the instruction is also essential A number of theories and models have been proposed in harnessing the technology in everyday lessons Among these attempts Technological and

Pedagogical Content Knowledge TPACK framework introduced by Mishra and Koehler has emerged as a representation of the complex relationships between technology pedagogy and content knowledge The TPACK framework extends the concept of Shulman s pedagogical content knowledge PCK which defines the need for knowledge about the content and pedagogical skills in teaching activities Since then the framework has been embraced by the educational technology practitioners instructional designers and educators TPACK research received increasing attention from education and training community covering diverse range of subjects and academic disciplines and significant progress has been made in recent years This book attempts to bring the practitioners and researchers to present current directions trends and approaches convey experience and findings and share reflection and vision to improve science teaching and learning with the use of TPACK framework A wide array of topics will be covered in this book including applications in teacher training designing courses professional development and impact on learning intervention strategies and other complex educational issues Information contained in this book will provide knowledge growth and insights into effective educational strategies in integration of technology with the use of TPACK as a theoretical and developmental tool The book will be of special interest to international readers including educators teacher trainers school administrators curriculum designers policy makers and researchers and complement the existing literature and published works New Directions in Education and Training Technology B.
