New Discoveries In Fundamental Physics And Psychology:

New Discoveries in Fundamental Physics and Psychology Luis A. Carlo, 1995-12-01 **The Ends of Knowledge** Rachael Scarborough King, Seth Rudy, 2023-06-01 Bringing together an exciting group of knowledge workers scholars and activists from across fields this book revisits a foundational question of the Enlightenment what is the last or furthest end of knowledge It is a book about why we do what we do and how we might know when we are done In the reorganization of knowledge that characterized the Enlightenment disciplines were conceived as having particular ends both in terms of purposes and end points As we experience an ongoing shift to the knowledge economy of the Information Age this collection asks whether we still conceptualize knowledge in this way Does an individual discipline have both an inherent purpose and a natural endpoint What do an experiment on a fruit fly a reading of a poem and the writing of a line of code have in common Focusing on areas as diverse as AI biology Black studies literary studies physics political activism and the concept of disciplinarity itself contributors uncover a life after disciplinarity for subjects that face immediate threats to the structure if not the substance of their contributions These essays whether reflective historical eulogistic or polemical chart a vital and necessary course towards the reorganization of knowledge production as a whole **The Rationality of Theism** Paul Copan, Paul Moser, 2004-07-31 The Rationality of Theism is a controversial collection of brand new papers by thirteen outstanding philosophers and scholars Its aim is to offer comprehensive theistic replies to the traditional arguments against the existence of God offering a positive case for theism as well as rebuttals of recent influential criticisms of theism

Beyond the Brain Stanislav Grof, 1985-01-01 Beyond the Brain seriously challenges the existing neurophysiological models of the brain After three decades of extensive research on those non ordinary states of consciousness induced by psychedelic drugs and by other means Grof concludes that our present scientific world view is as inadequate as many of its historical predecessors In this pioneering work he proposes a new model of the human psyche that takes account of his findings Grof includes in his model the recollective level or the reliving of emotionally relevant memories a level at which the Freudian framework can be useful Beyond that is perinatal level in which the human unconscious may be activated to a reliving of biological birth and confrontation with death How birth experience influences an individual s later development is a central focus of the book The most serious challenge to contemporary psycho analytic theory comes from a delineation of the transpersonal level or the expansion of consciousness beyond the boundaries of time and space Grof makes a bold argument that understanding of the perinatal and transpersonal levels changes much of how we view both mental illness and mental health His reinterpretation of some of the most agonizing aspects of human behavior proves thought provoking for both laypersons and professional therapists *The Frontiers of Knowledge* A. C. Grayling, 2021-05-06 Grayling brings satisfying order to daunting subjects Steven Pinker _____ In very recent times humanity has learnt a vast amount about the universe the past and itself But through our remarkable successes in acquiring knowledge we have learned

how much we have yet to learn the science we have for example addresses just 5 per cent of the universe pre history is still being revealed with thousands of historical sites yet to be explored and the new neurosciences of mind and brain are just beginning What do we know and how do we know it What do we now know that we don't know And what have we learnt about the obstacles to knowing more In a time of deepening battles over what knowledge and truth mean these questions matter more than ever Bestselling polymath and philosopher A C Grayling seeks to answer them in three crucial areas at the frontiers of knowledge science history and psychology A remarkable history of science life on earth and the human mind itself this is a compelling and fascinating tour de force written with verve clarity and remarkable breadth of knowledge

Remarkable readable and authoritative How he has mastered so much so thoroughly is nothing short of amazing Lawrence M Krauss author of A Universe from Nothing This book hums with the excitement of the great human project of discovery Adam Zeman author of Aphantasia Causation in Science and the Methods of Scientific Discovery Rani Lill Anjum, Stephen Mumford, 2018 Causal questions are relevant to all sciences and social sciences yet how we discover causal connections is no easy matter Indeed the choice of methods concerns the correct norms for the empirical study of the world In this text two experts on causation relate philosophical theory to scientific practice and propose nine new norms of discovery *Chemical News and Journal of Industrial Science*, 1898 **Chemical news and Journal of physical science**, 1898 *The Chemical News and Journal of Industrial Science*, 1898 The Chemical News, 1898
